

Life Science, Business, and Entrepreneurship

The Robinson Life Science, Business, and Entrepreneurship (LSBE) Program is designed to help students bridge scientific inquiry and research with entrepreneurship and commercial application. LSBE offers specialized coursework taught by award-winning faculty, networking opportunities and specialized career coaching, and mentoring opportunities within a peer-to-peer cohort of students who are working to become future leaders and innovators.

Through LSBE, students will earn a BS in Business Administration and a BA in Molecular and Cell Biology (MCB) in the emphasis of your choice: Biochemistry, Biophysics & Structural Biology; Cell Biology, Development, and Physiology; Genetics, Genomics, Evolution & Development; Immunology & Molecular Medicine; Molecular Therapeutics; or Neurobiology.

Admission to LSBE is highly competitive and open only to students who enter UC Berkeley as freshmen. Course planning begins during freshman year, and students apply for admission to LSBE during the fall of sophomore year. All prerequisite requirements (<https://lsbe.berkeley.edu/academics/>) for Business and MCB must be completed by the end of sophomore year.

Students who complete the Program will be uniquely advantaged for careers in a variety of innovative industries and research institutions and will be competitive applicants to graduate programs including pre-health, biosciences, MBA, and beyond.

LSBE students complete all academic requirements for *both* Business Administration and Molecular and Cell Biology in addition to the university and campus requirements, and all policies of each school are enforced. Additional Program requirements include a freshman introductory course and a senior capstone course. Students must contact LSBE staff to enroll in these program-specific courses.

Lower division and upper division Business Administration requirements can be found on the Business Administration program page (<https://haas.berkeley.edu/undergrad/academics/>).

Students have a choice between six emphases within Molecular and Cell Biology (<http://guide.berkeley.edu/undergraduate/degree-programs/molecular-cell-biology/#majorrequirementstext>):

- Biochemistry, Biophysics, & Structural Biology
- Cell Biology, Development & Physiology
- Genetics, Genomics, Evolution, and Development
- Immunology & Molecular Medicine
- Molecular Therapeutics
- Neurobiology

LSBE Program plans can be found on our website (<https://lsbe.berkeley.edu/academics/>).

Undergraduate students must fulfill the following requirements in addition to those required by their major program.

For detailed lists of courses that fulfill college requirements, please review the College of Letters & Sciences (<http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/>) page in this Guide. For

College advising appointments, please visit the L&S Advising (<https://lsadvising.berkeley.edu/home/>) Pages.

University of California Requirements

Entry Level Writing (<http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/entry-level-writing-requirement/>)

All students who will enter the University of California as freshmen must demonstrate their command of the English language by fulfilling the Entry Level Writing requirement. Fulfillment of this requirement is also a prerequisite to enrollment in all reading and composition courses at UC Berkeley.

American History and American Institutions (<http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/american-history-institutions-requirement/>)

The American History and Institutions requirements are based on the principle that a US resident graduated from an American university, should have an understanding of the history and governmental institutions of the United States.

Berkeley Campus Requirement

American Cultures (<http://americancultures.berkeley.edu/students/courses/>)

All undergraduate students at Cal need to take and pass this course in order to graduate. The requirement offers an exciting intellectual environment centered on the study of race, ethnicity and culture of the United States. AC courses offer students opportunities to be part of research-led, highly accomplished teaching environments, grappling with the complexity of American Culture.

College of Letters & Science Essential Skills Requirements

Quantitative Reasoning (<http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/quantitative-reasoning-requirement/>)

The Quantitative Reasoning requirement is designed to ensure that students graduate with basic understanding and competency in math, statistics, or computer science. The requirement may be satisfied by exam or by taking an approved course.

Foreign Language (<http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/foreign-language-requirement/>)

The Foreign Language requirement may be satisfied by demonstrating proficiency in reading comprehension, writing, and conversation in a foreign language equivalent to the second semester college level, either by passing an exam or by completing approved course work.

Reading and Composition (<http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/reading-composition-requirement/>)

In order to provide a solid foundation in reading, writing, and critical thinking the College requires two semesters of lower division work in composition in sequence. Students must complete parts A & B reading and composition courses in sequential order by the end of their fourth semester.

College of Letters & Science 7 Course Breadth Requirements

Breadth Requirements (<http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/#breadthrequirements>)

The undergraduate breadth requirements provide Berkeley students with a rich and varied educational experience outside of their major program. As the foundation of a liberal arts education, breadth courses give students a view into the intellectual life of the University while introducing them to a multitude of perspectives and approaches to research and scholarship. Engaging students in new disciplines and with peers from other majors, the breadth experience strengthens interdisciplinary connections and context that prepares Berkeley graduates to understand and solve the complex issues of their day.

Unit Requirements

- 120 total units
- Of the 120 units, 36 must be upper division units
- Of the 36 upper division units, 6 must be taken in courses offered outside your major department

Residence Requirements

For units to be considered in "residence," you must be registered in courses on the Berkeley campus as a student in the College of Letters & Science. Most students automatically fulfill the residence requirement by attending classes here for four years, or two years for transfer students. In general, there is no need to be concerned about this requirement, unless you go abroad for a semester or year or want to take courses at another institution or through UC Extension during your senior year. In these cases, you should make an appointment to meet an adviser to determine how you can meet the Senior Residence Requirement.

Note: Courses taken through UC Extension do not count toward residence.

Senior Residence Requirement

After you become a senior (with 90 semester units earned toward your BA degree), you must complete at least 24 of the remaining 30 units in residence in at least two semesters. To count as residence, a semester must consist of at least 6 passed units. Intercampus Visitor, EAP, and UC Berkeley-Washington Program (UCDC) units are excluded.

You may use a Berkeley Summer Session to satisfy one semester of the Senior Residence requirement, provided that you successfully complete 6 units of course work in the Summer Session and that you have been enrolled previously in the college.

Modified Senior Residence Requirement

Participants in the UC Education Abroad Program (EAP), Berkeley Summer Abroad, or the UC Berkeley Washington Program (UCDC) may meet a Modified Senior Residence requirement by completing 24 (excluding EAP) of their final 60 semester units in residence. At least 12 of these 24 units must be completed after you have completed 90 units.

Upper Division Residence Requirement

You must complete in residence a minimum of 18 units of upper division courses (excluding UCEAP units), 12 of which must satisfy the requirements for your major.

Each student's plan will vary depending on MCB emphasis and AP/IB exam scores, if applicable. Speak with the LSBE Student Experience Specialist to discuss your academic plan in more detail.

The sample course schedules below show a four-year plan for completing all program requirements, taking classes only during fall and spring semesters. Many courses are offered during the summer, as well. Please note that the MCB degree can be completed in 9 different ways, so the plan below indicates "MCB UD" for an MCB upper-division course that will depend on the emphasis you choose to pursue during your junior and senior years. **You should meet with the LSBE Associate Director to discuss your options in detail.**

	First Year	
	Fall Units	Spring Units
MATH 1A		4 MATH 1B 4
CHEM 1A		3 CHEM 3A 3
CHEM 1AL		2 CHEM 3AL 2
ENGLISH R1B		4 Breadth 3-4
Breadth		3-4 Breadth/AC 3-4
	16-17	15-17
	Second Year	
	Fall Units	Spring Units
UGBA 10		3 STAT 20 4
ECON 1		4 BIOLOGY 1A 3
CHEM 3B		3 BIOLOGY 1AL 2
CHEM 3BL		2 PHYSICS 8B 4
PHYSICS 8A		4 Breadth 3-4
Apply to the Program		Declare MCB
	16	16-17
	Third Year	
	Fall Units	Spring Units
UGBA 100		2 UGBA 102B 3
UGBA 101A		3 UGBA 103 4
UGBA 102A		3 MCB UD 4
BIOLOGY 1B		4 MCB UD 4
MCB UD		4 BREADTH 3-4
	16	18-19
	Fourth Year	
	Fall Units	Spring Units
UGBA 104		3 UGBA 106 3
UGBA 105		3 UGBA 107 3
LSBE CAPSTONE (UGBA + MCB ELECTIVE)		4 UGBA ELECTIVE 4
MCB UD		4 BREADTH 3-4
UGBA 101B		3 MCB UD 4
	17	17-18
Total Units: 131-137		

Plan Notes:

- This plan assumes one Breadth course will also be an AC course.
- This plan assumes the student has completed the Entry Level Writing, American History and Institutions, and Foreign Language requirement prior to admission to UC Berkeley.
- This plan assumes the student does not require CHEM 32 or MATH 32.
- This plan assumes exam score or prior course works will fulfill R&C A (<http://guide.berkeley.edu/undergraduate/colleges-schools/letters-science/reading-composition-requirement/>).
- BIOLOGY 1A, BIOLOGY 1B, MCELLBI 102, or MCELLBI C100A will fulfill Biological Sciences Breadth

- CHEM 1A, CHEM 3A, or CHEM 3B will fulfill Physical Sciences Breadth
- Molecular Cell Biology accepts AP for BIOLOGY 1A/BIOLOGY 1AL, BIOLOGY 1B and CHEM 1A/CHEM 1AL if not planning post-BA health-related programs. Talk with the LSBE advisor about this option.
- Haas accepts AP for Economics.

Major Maps help undergraduate students discover academic, co-curricular, and discovery opportunities at UC Berkeley based on intended major or field of interest. Developed by the Division of Undergraduate Education in collaboration with academic departments, these experience maps will help you:

- **Explore** your major and gain a better understanding of your field of study
- **Connect** with people and programs that inspire and sustain your creativity, drive, curiosity and success
- **Discover** opportunities for independent inquiry, enterprise, and creative expression
- **Engage** locally and globally to broaden your perspectives and change the world
- **Reflect** on your academic career and prepare for life after Berkeley

Use the major map below as a guide to planning your undergraduate journey and designing your own unique Berkeley experience.

View the Life Science, Business, and Entrepreneurship Major Map PDF. (https://ue.berkeley.edu/sites/default/files/life_science_business_and_entrepreneurship.pdf)

Life Sciences, Business, and Entrepreneurship Program staff are available on the third floor of the Valley Life Sciences Building in room 3060. Advising hours are Monday - Thursday 9:00 - 4:00 and Friday 9:00 - 3:00. The office closes for lunch from 12:00 - 1:00 every day. Check our website (<https://lsbe.berkeley.edu/meet-team/contact-us/>) for details regarding our advising hours as they are subject to change throughout the year. To schedule an appointment or for more information about the Program, email lsbe@berkeley.edu.

MCELLBI 15 Current Topics in the Biological Sciences 2 Units

Terms offered: Spring 2024, Spring 2023, Spring 2022

Students in this course will critically examine modern methods of biological investigations and their social implications. Relevant literature will be used to present basic biological concepts that address the cultural, technological and health aspects of current topics in the biological sciences. Designing and evaluating scientific questions will be stressed. Current Topics in the Biological Sciences: [Read More](#) [+]

Rules & Requirements

Prerequisites: Suitable for freshmen who plan to major in a biological science

Repeat rules: Course may be repeated for credit when topic changes.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam not required.

Instructor: Matsui

Current Topics in the Biological Sciences: [Read Less](#) [-]

MCELLBI 24 Freshman Seminars 1 Unit

Terms offered: Fall 2024, Spring 2024, Fall 2023

The Berkeley Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Berkeley Seminars are offered in all campus departments, and topics vary from department to department and semester to semester. Final assessment to be decided by the instructor when the class is offered.

Freshman Seminars: [Read More](#) [+]

Rules & Requirements

Prerequisites: Open to freshmen only

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 1 hour of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: The grading option will be decided by the instructor when the class is offered. Alternative to final exam.

Formerly known as: Molecular and Cell Biology 90A

Freshman Seminars: [Read Less](#) [-]

MCELLBI C31 Big Ideas in Cell Biology 3 Units

Terms offered: Spring 2014, Spring 2012

An introduction for students who do not intend to major in biology but who wish to satisfy their breadth requirement in Biological Sciences. Some major concepts of modern biology, ranging from the role of DNA and the way cells communicate, to interactions of cells and creatures with their environment, will be discussed without jargon and with attention to their relevance in contemporary life and culture.

Big Ideas in Cell Biology: [Read More](#) [+]

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Wilt

Also listed as: L & S C30X

Big Ideas in Cell Biology: [Read Less](#) [-]

MCELLBI 32 Introduction to Human Physiology 3 Units

Terms offered: Fall 2024, Summer 2024 8 Week Session, Fall 2023

A comprehensive introduction to human biology. The course will concentrate on basic mechanisms underlying human life processes, including cells and membranes; nerve and muscle function; cardiovascular, respiratory, renal, and gastrointestinal physiology; metabolism, endocrinology, and reproduction.

Introduction to Human Physiology: [Read More](#) [+]

Rules & Requirements

Prerequisites: One year high school or college chemistry

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Summer: 8 weeks - 6 hours of lecture and 2 hours of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Ball

Introduction to Human Physiology: [Read Less](#) [-]

MCELLBI 32L Introduction to Human Physiology Laboratory 2 Units

Terms offered: Fall 2024, Summer 2024 Second 6 Week Session, Fall 2023

Experiments and demonstrations are designed to amplify and reinforce information presented in 32. Exercises include investigations into the structure and function of muscle, nerve, cardiovascular, renal, respiratory, endocrine, and blood systems.

Introduction to Human Physiology Laboratory: [Read More](#) [+]

Rules & Requirements

Prerequisites: 32 or may be taken concurrently

Hours & Format

Fall and/or spring: 15 weeks - 1 hour of lecture and 3 hours of laboratory per week

Summer:

6 weeks - 2 hours of lecture and 8 hours of laboratory per week

8 weeks - 2 hours of lecture and 6 hours of laboratory per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam not required.

Instructor: Ball

Introduction to Human Physiology Laboratory: [Read Less](#) [-]

MCELLBI 38 Stem Cell Biology, Ethics and Societal Impact 3 Units

Terms offered: Spring 2024, Spring 2023, Spring 2022

Innovations in bioengineering and use of stem cells will significantly impact our ability to combat human disease, genetic disorders and physiological dysfunction. An understanding of human stem cell biology will be critical to make informed decisions on our health and public policy.

Stem Cell Biology, Ethics and Societal Impact: [Read More](#) [+]

Rules & Requirements

Repeat rules: Course may be repeated for credit with instructor consent.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Firestone, Ball

Stem Cell Biology, Ethics and Societal Impact: [Read Less](#) [-]

MCELLBI 41 Genetics and Society 3 Units

Terms offered: Spring 2016, Spring 2013, Summer 2012 8 Week Session
 Basic communication of inheritance; gene mapping; gene expression and genetic disease in animals and humans; social inheritance of genetics.
 Genetics and Society: Read More [+]

Rules & Requirements

Prerequisites: Primarily for students not specializing in biology

Credit Restrictions: Students will receive no credit for Molecular and Cell Biology 41 after completing Biology 1A, Biology 1B, or Letters and Science 18.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Summer:

6 weeks - 7.5 hours of lecture per week

8 weeks - 6 hours of lecture and 2 hours of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Genetics and Society: Read Less [-]

MCELLBI C44 Biology for Voters 3 Units

Terms offered: Spring 2017, Spring 2015, Spring 2014

This is a Discovery Course for non-Biology majors designed to introduce lower-division college students to biology through the lens of the contemporary problems facing people, the planet and the species of the planet. Modern genetic contributions will be presented on such issues as genetic engineering of plants and animals, the emergence of new pathogens, the role of genetic variation among individuals, and the extent to which DNA is and isn't destiny. Each week will close with the presentation and discussion of a defining biological challenge facing the world.

Biology for Voters: Read More [+]

Objectives & Outcomes

Student Learning Outcomes: The learning objectives will be, at one end, to understand what an experiment is, how is it controlled and what does one need to know about an experiment to be able to rely upon any conclusion. That is the fundamental issue in all science, and is frequently overlooked in many media accounts of science. A second objective is to learn enough of the language of biology to be able to ask the kind of informed questions that we would want all elected representatives to pay attention to. A third objective is for students to cultivate confidence that through non-specialized information sources they can become informed consumers of contemporary scientific thought, and to develop those habits of intellect to think about evidence in a scientific manner. A fourth objective is for students to enjoy the abundance of high quality books, articles and multimedia that will enable a lifetime of discovery outside the structure of a college course.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Rine, Urnov

Also listed as: L & S C30Y

Biology for Voters: Read Less [-]

MCELLBI 50 The Immune System and Disease 4 Units

Terms offered: Spring 2024, Spring 2023, Spring 2022

Course will discuss how the immune system resolves, prevents, or causes disease. A general overview of the immune system will be covered in the first five weeks followed by five weeks discussing infectious diseases including anthrax, mad cow, herpes, malaria, tuberculosis, and HIV. In addition, other lectures will focus on current immunology topics including vaccines, autoimmunity, allergy, transplantation, and cancer.

The Immune System and Disease: [Read More](#) [+]

Rules & Requirements

Prerequisites: High school chemistry or Chemistry 1A and high school biology or Biology 1A. Biology 1AL is not required

Credit Restrictions: Students will receive no credit for Molecular and Cell Biology 50 after completing Molecular and Cell Biology 102, C100A/Chemistry C130, or Chemistry 135.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Beatty

The Immune System and Disease: [Read Less](#) [-]

MCELLBI 55 Plagues and Pandemics 3 Units

Terms offered: Fall 2024, Summer 2024 Second 6 Week Session, Fall 2023

Discussion of how infectious agents cause disease and impact society at large. We will examine historical and current examples of plagues and pandemics and consider the question of what we should do to ameliorate the impact of infectious disease in the future. The course is intended for non-majors and will begin by briefly providing necessary background in microbiology and immunology. The primary focus in each subsequent week, however, will be on discussing a particular infectious disease. The course will be broad in scope covering biological, historical, ethical and social implications of each disease.

Plagues and Pandemics: [Read More](#) [+]

Rules & Requirements

Credit Restrictions: Students will receive no credit for MCELLBI 55 after completing CHEM C130, MCELLBI 150, MCELLBI C103, MCELLBI 102, or CHEM 135.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Summer: 6 weeks - 7.5 hours of lecture per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Beatty, Vance

Plagues and Pandemics: [Read Less](#) [-]

MCELLBI 63L Introduction to Neuroanatomy Lab 2 Units

Terms offered: Summer 2019 Second 6 Week Session

This lab course is an introduction to mammalian neuroanatomy for non-MCB majors. We will do dissections, explore physical anatomical models, and observe microscopic structures within preserved brain slices from a variety of mammalian species. The hands-on exploration of anatomy is key to understanding how the different functional regions of the nervous system are interconnected. Besides gaining a better understanding of anatomy, you will gain important scientific skills such as conducting parts of a neurological exam, fluorescent and light microscopy, reading MRI scans and conducting fine dissections. The course will culminate with a group project using the online Allen Brain Atlas to investigate a novel scientific question.

Introduction to Neuroanatomy Lab: [Read More](#) [+]

Rules & Requirements

Prerequisites: MCELLBI 63 (may be taken concurrently) or equivalent

Credit Restrictions: Students will receive no credit for Molecular and Cell Biology 63L after taking Molecular and Cell Biology 160L or 163L

Hours & Format

Summer: 6 weeks - 8 hours of laboratory per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

Instructor: Ball

Introduction to Neuroanatomy Lab: [Read Less](#) [-]

MCELLBI C75 Introduction to the Biotechnology Field and Industry 2 Units

Terms offered: Spring 2019

This course offers an introduction to the field of biotechnology and will cover the history of the field, its impact on medicine and society, key methodologies, important therapeutic areas, and the range of career options available in the biopharmaceutical industry. In addition to lectures on innovation and entrepreneurship, students will hear from lecturers with expertise ranging from molecular biology to clinical trial design and interpretation. Several case studies of historically impactful scientists, entrepreneurs, and biotherapeutic companies will be presented. Students will work in teams to create and develop novel biotechnology company ideas to present in class. Intended for students interested in the Biology +Business program.

Introduction to the Biotechnology Field and Industry: [Read More](#) [+]

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Offered for pass/not pass grade only. Alternative to final exam.

Instructors: Kirn, Lasky

Formerly known as: Molecular and Cell Biology C95B/Undergrad. Business Administration C95B

Also listed as: UGBA C95B

Introduction to the Biotechnology Field and Industry: [Read Less](#) [-]

MCELLBI 84B Sophomore Seminar 1 or 2 Units

Terms offered: Fall 2013, Spring 2013, Fall 2012

Sophomore seminars are small interactive courses offered by faculty members in departments all across the campus. Sophomore seminars offer opportunity for close, regular intellectual contact between faculty members and students in the crucial second year. The topics vary from department to department and semester to semester. Enrollment limited to 15 sophomores.

Sophomore Seminar: Read More [+]

Rules & Requirements

Prerequisites: At discretion of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 1-2 hours of seminar per week

Summer:

6 weeks - 4-6 hours of seminar per week

8 weeks - 3-4 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: The grading option will be decided by the instructor when the class is offered. Final exam required.

Sophomore Seminar: Read Less [-]

MCELLBI 88 Immunotherapy of Cancer: Success and Failures 2 Units

Terms offered: Spring 2018, Spring 2017

We will work with a variety of datasets that describe a molecular view of cells and how they divide. We will learn about the processes that cause cells to become specialized (differentiate) and to give rise to cancer (transform). We will analyze data on genetic mutations in cancer that distinguish tumor cells from normal cells. We will learn how mutations are detected by the immune system and the basis of cancer immunotherapy. Finally we will analyze data on clinical trials of cancer immunotherapy to define the correlates of success in curing the disease. The students are expected to gain an understanding of data that reveals the basics of cell physiology and cancer, how immunotherapies of cancer work and their current limitations.

Immunotherapy of Cancer: Success and Failures: Read More [+]

Rules & Requirements

Prerequisites: Foundations of Data Science: COMPSCI C8, DATASCI C8, INFO C8 or STAT C8

Hours & Format

Fall and/or spring: 15 weeks - 1 hour of lecture and 1 hour of laboratory per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

Instructor: Shastri

Immunotherapy of Cancer: Success and Failures: Read Less [-]

MCELLBI C96 Studying the Biological Sciences 1 Unit

Terms offered: Fall 2024, Fall 2023, Fall 2022

Students will be introduced to the "culture" of the biological sciences, along with an in-depth orientation to the academic life and the culture of the university as they relate to majoring in biology. Students will learn concepts, skills, and information that they can use in their major courses, and as future science professionals.

Studying the Biological Sciences: Read More [+]

MCELLBI 102 Survey of the Principles of Biochemistry and Molecular Biology 4 Units

Terms offered: Fall 2024, Summer 2024 8 Week Session, Spring 2024

A comprehensive survey of the fundamentals of biological chemistry, including the properties of intermediary metabolites, the structure and function of biological macromolecules, the logic of metabolic pathways (both degradative and biosynthetic) and the molecular basis of genetics and gene expression.

Survey of the Principles of Biochemistry and Molecular Biology: Read More [+]

Rules & Requirements

Prerequisites: BIOLOGY 1A and CHEM 3B with minimum grades of C- (or equivalent courses). Recommended: a course in physical chemistry

Credit Restrictions: Students will receive no credit for 102 after taking 100B or C100A/Chemistry C130 or Chemistry 135.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Summer:

8 weeks - 6 hours of lecture and 2 hours of discussion per week
10 weeks - 4 hours of lecture and 2 hours of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Survey of the Principles of Biochemistry and Molecular Biology: Read Less [-]

MCELLBI C103 Bacterial Pathogenesis 3 Units

Terms offered: Spring 2024, Spring 2023, Spring 2022

This course for upper division and graduate students will explore the molecular and cellular basis of microbial pathogenesis. The course will focus on model microbial systems which illustrate mechanisms of pathogenesis. Most of the emphasis will be on bacterial pathogens of mammals, but there will be some discussion of viral and protozoan pathogens. There will be an emphasis on experimental approaches. The course will also include some aspects of bacterial genetics and physiology, immune response to infection, and the cell biology of host-parasite interactions.

Bacterial Pathogenesis: Read More [+]

Rules & Requirements

Prerequisites: BIOLOGY 1A and CHEM 3B

Credit Restrictions: Students will receive no credit for MCELLBI C103 after completing PB HLTH 262.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Portnoy

Also listed as: PLANTBI C103

Bacterial Pathogenesis: Read Less [-]

MCELLBI 104 Genetics, Genomics, and Cell Biology 4 Units

Terms offered: Fall 2024, Summer 2024 8 Week Session, Spring 2024
This course will introduce students to key concepts in genetic analysis, eukaryotic cell biology, and state-of-the-art approaches in genomic medicine. Lectures will highlight basic knowledge of cellular processes with the basis for human diseases, particularly cancer. Prerequisite courses will have introduced students to the concepts of cells, the central dogma of molecular biology, and gene regulation. Emphasis in this course will be on eukaryotic cell processes, including cellular organization, dynamics, and signaling.

Genetics, Genomics, and Cell Biology: Read More [+]

Rules & Requirements

Prerequisites: BIOLOGY 1A

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

MCELLBI C110L General Biochemistry and Molecular Biology Laboratory 4 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Experimental techniques of biochemistry and molecular biology, designed to accompany the lectures in Molecular and Cell Biology 100B and 110.

General Biochemistry and Molecular Biology Laboratory: Read More [+]

Rules & Requirements

Prerequisites: 110 (may be taken concurrently)

Hours & Format

Fall and/or spring: 15 weeks - 2-2 hours of lecture and 6-8 hours of laboratory per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam not required.

Also listed as: CHEM C110L

General Biochemistry and Molecular Biology Laboratory: Read Less [-]

MCELLBI C112 General Microbiology 4 Units

Terms offered: Fall 2024, Summer 2024 10 Week Session, Fall 2023

This course will explore the molecular bases for physiological and biochemical diversity among members of the two major domains, Bacteria and Archaea. The ecological significance and evolutionary origins of this diversity will be discussed. Molecular, genetic, and structure-function analyses of microbial cell cycles, adaptive responses, metabolic capability, and macromolecular syntheses will be emphasized.

General Microbiology: Read More [+]

Rules & Requirements

Prerequisites: Biology 1A and 1B

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Summer: 10 weeks - 5 hours of lecture and 1.5 hours of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Also listed as: PLANTBI C112

General Microbiology: Read Less [-]

MCELLBI C112L General Microbiology Laboratory 3 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Students will become proficient in basic microbiology research methods and experimental design. The course covers fundamental principles and techniques of the microbiology lab including sterile technique, culturing, and microscopy. Students will learn these methods in the context of two structured, discovery-based research projects: predicting and analyzing the phenotypes of E. coli metabolic mutants, and isolating and characterizing bacteria with novel properties from environmental samples. Student will synthesize their results in the format of a Journal of Bacteriology research article and a scientific poster presentation.

Prerequisites: C112 (may be taken concurrently)

Hours & Format

Fall and/or spring: 15 weeks - 4 hours of laboratory and 1 hour of discussion per week

Summer: 10 weeks - 6 hours of laboratory and 2 hours of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

Instructors: Komeili, Traxler

Also listed as: PLANTBI C112L

General Microbiology Laboratory: Read Less [-]

MCELLBI C114 Introduction to Comparative Virology 4 Units

Terms offered: Spring 2024, Spring 2023, Spring 2022

This course will provide a comparative overview of virus life cycles and strategies viruses use to infect and replicate in hosts. We will discuss virus structure and classification and the molecular basis of viral reproduction, evolution, assembly, and virus-host interactions. Common features used during virus replication and host cellular responses to infection will be covered. Topics also included are common and emerging virus diseases, their control, and factors affecting their spread.

Introduction to Comparative Virology: Read More [+]

Rules & Requirements

Prerequisites: Introductory chemistry (Chemistry 1A or 3A-3B or equivalent) and introductory biology (Biology 1A, 1AL, and 1B or equivalent) and general biochemistry (Molecular and Cell Biology C100A or equivalent--preferably completed but may be taken concurrently)

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1.5 hours of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Glaunsinger

Introduction to Comparative Virology: Read Less [-]

MCELLBI C116 Microbial Diversity 3 Units

Terms offered: Fall 2024, Fall 2022, Fall 2021

This course for upper-division and graduate students will broadly survey myriad types of microbial organisms, both prokaryote and eukaryote, using a phylogenetic framework to organize the concept of "biodiversity." Emphasis will be on the evolutionary development of the many biochemical themes, how they mold our biosphere, and the organisms that affect the global biochemistry. Molecular mechanisms that occur in different lineages will be compared and contrasted to illustrate fundamental biological strategies. Graduate students additionally should enroll in C216, Microbial Diversity Workshop.

Microbial Diversity: [Read More](#) [+]

Rules & Requirements

Prerequisites: Upper-division standing. C112 or consent of instructor and organic chemistry (may be taken concurrently)

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Coates

Also listed as: PLANTBI C116

Microbial Diversity: [Read Less](#) [-]

MCELLBI C117 Advanced Plant Biochemistry 4 Units

Terms offered: Spring 2024, Spring 2023

Students will build on the central metabolic pathways to learn about plant-specific metabolism from a more mechanistic perspective, including photosynthesis, regulation of sugar and starch metabolism, chloroplast-based pathways of inorganic nutrient (nitrogen, sulfur) processing, N₂ fixing in free-living and symbiotic bacteria, polyunsaturated fatty acid and oil biosynthesis and accumulation, secondary metabolism, cell-wall structure and biosynthesis. Instruction will focus on a research-based approach, including retrieving and researching the primary literature, and understanding experimental design in modern plant biochemistry.

Advanced Plant Biochemistry: [Read More](#) [+]

Rules & Requirements

Prerequisites: A minimum grade of C- in MCELLBI C100A/CHEM C130, MCELLBI 102, MCELLBI 104, MCELLBI 140, PLANTBI 135, or equivalent

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture, 1 hour of discussion, and 1 hour of tutorial per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Merchant

Also listed as: PLANTBI C136

Advanced Plant Biochemistry: [Read Less](#) [-]

MCELLBI 120 Therapeutics Discovery and Development 4 Units

Terms offered: Fall 2024, Fall 2023

This class is designed to introduce students to crucial concepts that underlie the discovery and development of therapeutic modalities. It will cover questions of target discovery and validation; basic properties of therapeutic modalities, such as small molecules, designer proteins, or genome engineering approaches; the design and execution of chemical screens; the medicinal chemistry, pharmacodynamics and -kinetics that is required for drug development; and the steps needed to introduce a new modality into the clinic. Lectures are based on a combination of textbook readings and primary literature and summarized through case studies that highlight critical aspects of drug discovery and development.

Therapeutics Discovery and Development: [Read More](#) [+]

Rules & Requirements

Prerequisites: MCELLBI 104 (can be taken concurrently) and MCELLBI C100A/CHEM C130 or MCELLBI 102

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Urnov

Therapeutics Discovery and Development: [Read Less](#) [-]

MCELLBI 120L Therapeutics Discovery Laboratory 4 Units

Terms offered: Not yet offered

This lab course will familiarize students with general principles of drug discovery and action. The first module focuses on aspects of small molecule function by comparing stoichiometric inhibitors and PROTAC molecules against the BTK kinase. Students will learn how to purify protein, monitor drug binding and in vitro efficiency, and determine effects on cell survival. The second module focuses on genomic therapies by introducing students to principles of CRISPR genome editing. Students will design genome editing strategies and cognate guide RNAs and then perform an editing experiment that replaces a catalytic Cys residue in BTK with Ser. Students will compare stoichiometric inhibitors against BTK to PROTAC in wildtype or mutant cells.

Therapeutics Discovery Laboratory: [Read More](#) [+]

MCELLBI C130 Cell Biology: from Discovery to Disease 4 Units

Terms offered: Spring 2024

This course will investigate a wide range of topics in cell biology, focusing on modern and classic experimental approaches that have provided important insights, and the relevance of their findings to understanding human health and disease. We will emphasize the importance of quantitative understanding in research topics that are current areas of discovery. We aim to convey an understanding of how cellular structure and function arise as a result of the properties of macromolecules and how understanding the behavior of molecules is needed to explain how cells and organisms operate. This understanding thus also explains what happens when normal cellular functions are impacted, leading to cellular dysfunction and disease.

Cell Biology: from Discovery to Disease: Read More [+]

Rules & Requirements

Prerequisites: Upper Division Standing; MCELLBI 102 or MCELLBI C100A

Credit Restrictions: Students will receive no credit for MCELLBI 130 after completing MCELLBI 130.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

MCELLBI 133L Physiology and Cell Biology Laboratory 4 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Experimental analyses of central problems in cell biology and physiology using modern techniques, including DNA cloning and protein biochemistry, fluorescence microscopy of the cytoskeleton and organelles, DNA transfection and cell cycle analysis of cultured mammalian cells, RNA interference and drug treatments to analyze ion channel function in cell contractility and intracellular signaling, and somatosensation.

Physiology and Cell Biology Laboratory: Read More [+]

Rules & Requirements

Prerequisites: BIOLOGY 1A

Credit Restrictions: Students will receive no credit for 133L after taking 130L.

Hours & Format

Fall and/or spring: 15 weeks - 1 hour of lecture and 7 hours of laboratory per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam not required.

Physiology and Cell Biology Laboratory: Read Less [-]

MCELLBI C134 Genome Organization and Nuclear Dynamics 3 Units

Terms offered: Spring 2024, Fall 2022, Spring 2022

This course focuses on the structure, functions, and dynamics of eukaryotic chromosomes and their organization within cell nuclei. All life on earth relies on genetic information, which is encoded within nucleic acids (DNA and RNA). Most organisms have DNA-based genomes; bacterial and archaeal genomes typically comprise a single circular DNA molecule, while the genomes of most eukaryotes are divided into a variable number of linear DNA molecules. These contiguous DNA strands, along with the associated proteins and other components that contribute to their organization and function, are known as "chromosomes."

Genome Organization and Nuclear Dynamics: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

MCELLBI 137L Physical Biology of the Cell 4 Units

Terms offered: Spring 2024, Spring 2022, Spring 2020

Biology is being revolutionized by new experimental techniques that have made it possible to measure the inner workings of molecules, cells and multicellular organisms with unprecedented precision. The objective of this course is to explore this deluge of quantitative data through the use of biological numeracy. We will develop theoretical models that make precise predictions about biological phenomena. These predictions will be tested through the hands-on analysis of experimental data and by performing numerical simulations using Matlab. A laptop is required for this course, but no previous programming experience is required.

Physical Biology of the Cell: Read Less [-]

MCELLBI 140 General Genetics 4 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

An in depth introduction to genes, their sexual and asexual transmission in individuals and populations, and gene regulation in prokaryotes and eukaryotes. Gene manipulation by recombination, molecular cloning and genome editing is presented in contexts ranging from fundamental mechanisms of chromosome biology to applications in development, aging and disease. Human genetic variation and quantitative evaluation are illuminated. Non-Mendelian and epigenetic modes of inheritance of transposable elements, prions and chromatin states are paired with discussions of groundbreaking technology rewriting the rules of how the genome is analyzed, with attention to the ethical considerations ranging from the history of eugenics to modern controversies.

MCELLBI C146 Data Science for Biology 3 Units

Terms offered: Spring 2024, Fall 2022, Spring 2007, Spring 2005

Biology has become a data science! This lab course aims for student curiosity to drive hands-on

case studies and coding projects about biological applications of data science. The course design

supports students' development of fundamental and transferable computational and statistical

skills for critically thinking about and using data in biology. Ethical considerations are

interwoven throughout. This course offers projects with multiple levels of sophistication and

complexity, enabling participation for students with varying levels of experience.

Data Science for Biology: Read More [+]

Objectives & Outcomes

Course Objectives: Students will become empowered to use basic coding approaches to access, work with, and analyze biological data

Students will learn how to appropriately apply statistical tests to biological data

Students will learn how to select and evaluate methods and tools for data analysis

Students will understand how to grapple with the ethical considerations of biological data

Rules & Requirements

Prerequisites: Biology 1A; Biology 1B (can be taken concurrently); Data C8 or equivalent statistics and programming experience

Hours & Format

Fall and/or spring: 15 weeks - 4 hours of laboratory per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Alternate method of final assessment during regularly scheduled final exam group (e.g., presentation, final project, etc.).

MCELLBI 153 Molecular Medicine 4 Units

Terms offered: Fall 2024, Fall 2023, Fall 2022

The overarching goal of MCB153 is to convey to students the scientific and regulatory process by which therapeutic drugs are developed and created. After completing this course, students will have a firm understanding on the mechanism of action of several therapies used to fight disease. The course will cover areas such as the discovery and refinement of antibiotics, anti-virals, cancer therapies and CRISPR-based therapies. Furthermore, MCB153 will delve into disease areas not covered in other courses, such as autoimmune diseases, cardiovascular diseases and neurological diseases. Lastly, MCB153 will implement a "case study" for each topic displaying real world challenges and solutions to treating complex diseases.

MCELLBI 160 Cellular and Molecular Neurobiology 4 Units

Terms offered: Fall 2023, Fall 2022, Fall 2021

Comprehensive introductory survey of cellular and molecular neuroscience, including cellular neurophysiology, ion channel function, synaptic function and plasticity, sensory transduction, and brain development. Includes introduction to molecular basis of neurological disease. Analysis from the level of molecules to cells to simple circuits. Cellular and Molecular Neurobiology: Read More [+]

Rules & Requirements

Prerequisites: Biology 1A and 1AL. Prerequisite or co-requisite: Physics 8B

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Formerly known as: Molecular and Cell Biology C160/Neuroscience C160

Cellular and Molecular Neurobiology: Read Less [-]

MCELLBI 160L Neurobiology Laboratory 4 Units

Terms offered: Fall 2023, Fall 2022, Fall 2021

Experimental analyses of properties and interactions of nerve cells and systems, illustrating principal features and current methods. Techniques employed include computer simulation of neuron properties, electrophysiological recording and stimulation of nerves and cells, digitally enhanced video imaging of outgrowth, fluorescence immunocytochemistry, analysis of sensory: CNS mapping, human-evoked potential recording, sensory psychophysics.

Neurobiology Laboratory: Read More [+]

Rules & Requirements

Prerequisites: Biology 1A, 1AL; Physics 8A, 8B; MCB 160 or equivalent (may be taken concurrently). Recommended: a course in physical chemistry

Hours & Format

Fall and/or spring: 15 weeks - 1 hour of lecture and 8 hours of laboratory per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam not required.

Neurobiology Laboratory: Read Less [-]

MCELLBI 166 Biophysical Neurobiology 3 Units

Terms offered: Fall 2023, Fall 2022, Fall 2021

Electrochemistry and ion transport phenomena, equivalent circuits, excitability, action potentials, voltage clamp and the Hodgkin-Huxley model. Biophysical properties of ion channels. Statistical and electrophysiological models of synaptic transmission, Quantitative models for dendritic structure and neuronal morphogenesis. Sensory transduction, cellular networks as computational devices, information processing and transfer.

Biophysical Neurobiology: [Read More \[+\]](#)

Objectives & Outcomes

Course Objectives: 1)

Derive equations for Nernst and GHK membrane potential from fundamental physics concepts.

2)

Describe the experiments and theory underlying the Hodgkin-Huxley model.

3)

Understand biophysical properties of gating particles called ion channels.

4)

Apply and solve equivalent circuit models to describe resting and excitable cells, synaptic transmission and sensory transduction.

5)

Use Poisson, Gaussian and binomial distributions to analyze the gating of ion channels, synaptic transmission, and absolute sensitivity of vision.

6)

Model dendritic structure based on quantitative descriptors of shape and energy minimization theory.

7)

Explain experiments and models of sensory transduction, neuronal integration and lateral inhibition.

Rules & Requirements

Prerequisites: Biology 1A, 1AL, Physics 8A-8B, Chemistry 1A, 3A/3AL-3B, or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Elul, Isacoff, Miller

Biophysical Neurobiology: [Read Less \[-\]](#)

MCELLBI 168 Sensory Neuroscience 4 Units

Terms offered: Fall 1995

Sensory cells monitor the environment to trigger behaviors required to feed, avoid danger and thrive. This interactive course combines lectures with instructor-led discussions of research from the scientific literature. Our goals are two fold. First, we will present current concepts in sensory neurobiology by illustrating how different sensory inputs govern homeostasis and behavior. Second, through discussions of scientific data, the course will foster critical thinking skills, and provide practice in drawing logical, evidence-based conclusions.

Sensory Neuroscience: [Read More \[+\]](#)

Rules & Requirements

Prerequisites: MCELLBI 160 or BIOLOGY 1A/1AL-1B, PHYSICS 8A-8B and consent of Instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Lumpkin, Bautista

Sensory Neuroscience: [Read Less \[-\]](#)

MCELLBI 170L Molecular and Cell Biology Laboratory 4 Units

Terms offered: Summer 2024 First 6 Week Session, Summer 2023 First 6 Week Session, Summer 2022 First 6 Week Session

This laboratory course for majors in Chemical Biology, Cell Biology, and Biochemistry & Molecular Biology is designed to have students learn the theory and practicality of modern laboratory science. The first and last third of the course will focus on Molecular Biology and Biochemistry where the students will learn basic skills and investigate the role of Kinesin 5 in Mitosis. In the middle Cell Biology portion of the course you will learn about cell structure and the cytoskeleton with an emphasis on microscopy techniques.

Molecular and Cell Biology Laboratory: [Read More](#) [+]

Rules & Requirements

Prerequisites: MCELLBI 102, MCELLBI 104, MCELLBI 110 or MCELLBI 140

Credit Restrictions: Students will receive no credit for Molecular and Cell Biology 170L after taking Molecular and Cell Biology 133L, 140L or C110L/Chemistry C110L

Hours & Format

Summer: 6 weeks - 5 hours of lecture and 14 hours of laboratory per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Final exam not required.

Instructor: Le Blanc

Molecular and Cell Biology Laboratory: [Read Less](#) [-]

MCELLBI C175 Life Sciences, Business, and Entrepreneurship Capstone Course 4 Units

Terms offered: Prior to 2007

Blended lecture / Project-based course where student teams build out a business plan for a mock biotech company, demonstrating advanced knowledge in therapeutics and business development. Throughout the course student teams will work toward a final project in which they will identify and present a technology overview, disease overview and explanation of unmet need, a development plan, a commercialization plan, risk mitigation strategy, and financials. Class will include field trips, guest lectures, and a pitch competition with prize.

Life Sciences, Business, and Entrepreneurship Capstone Course: [Read More](#) [+]

Rules & Requirements

Prerequisites: Students must be in their fourth and final year of the Life Sciences, Business, and Entrepreneurship Program in order to enroll in this class

Hours & Format

Fall and/or spring: 15 weeks - 4 hours of lecture per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

Instructors: Schaletzky, Dillin

Also listed as: UGBA C195C

MCELLBI 180 Undergraduate Teaching of Biology 1A Laboratory 1 or 2 Units

Terms offered: Summer 2022 8 Week Session, Spring 2012, Spring 2007

Course consists of a weekly three-hour training session that focuses on laboratory techniques, instructional aids, and problem solving, plus an additional three hour weekly laboratory where the UGSI is required to assist a GSI in the instruction of laboratory (answering questions, providing demonstrations, etc.).

Undergraduate Teaching of Biology 1A Laboratory: [Read More](#) [+]

Rules & Requirements

Prerequisites: Biology 1A, 1AL with a minimum grade of B. Appointment as a UGSI in biology by consent of instructor. Restricted to undergraduate students

Repeat rules: Course may be repeated for credit up to a total of 4 units.

Hours & Format

Fall and/or spring: 15 weeks - 3-6 hours of session per week

Summer: 8 weeks - 6-12 hours of session per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

Undergraduate Teaching of Biology 1A Laboratory: [Read Less](#) [-]

MCELLBI 180C Undergraduate Teaching of Molecular and Cell Biology 32 Laboratory 1 - 2 Units

Terms offered: Fall 2012, Fall 2011, Fall 2010

Course consists of a weekly three-hour training session that focuses on laboratory techniques, instructional aids, and problem solving, plus an additional three-hour weekly laboratory where the UGSI is required to assist a GSI in the instruction of laboratory (answering questions, providing demonstrations, etc.). Students will be graded on lecture and laboratory attendance and preparation of one quiz.

Undergraduate Teaching of Molecular and Cell Biology 32 Laboratory: [Read More](#) [+]

Rules & Requirements

Prerequisites: 32, 136, or Integrative Biology 132 and Molecular and Cell Biology 32L or Integrative Biology 132L laboratory courses in physiology with minimum grades of B. Appointment as a UGSI in physiology by consent of instructor

Repeat rules: Course may be repeated for credit up to a total of 4 units.

Hours & Format

Fall and/or spring: 15 weeks - 3-6 hours of session per week

Summer:

6 weeks - 7.5-15 hours of session per week

8 weeks - 5.5-11 hours of session per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Offered for pass/not pass grade only. Final exam required.

MCELLBI N184L Intro to CRISPR Lab: From Basic Biology to Genome Editing Technology 1 Unit

Terms offered: Summer 2019 3 Week Session

This 3 week lab course will focus on applications of CRISPR technology as a platform for genome editing and functional genomics. The program will consist of a hands-on laboratory experience demonstrating how CRISPR systems work in situ, as well as use genome editing both in vitro and in vivo. Students will utilize fundamental molecular biology techniques and learn additional protocols specific to genome editing. Two bioinformatics based lessons will cover the essential programs and analyses used in the genome editing field. This course requires concurrent enrollment in a lecture component (MCELLBI N184), where lecturers will address topics in genome editing and CRISPR-Cas9 research.

MCELLBI 191 Senior Research Thesis 3 Units

Terms offered: Spring 2021, Spring 2020

This course is intended for advanced undergraduates wishing to pursue independent research projects under the mentorship of an Molecular and Cell Biology faculty member. To apply for MCELLBI 191, the research project must be rigorous and provide significant training in biology.

Senior Research Thesis: [Read More](#) [+]

Rules & Requirements

Prerequisites: Consent of instructor and departmental adviser

Credit Restrictions: Students will receive no credit for MCELLBI 191 after completing MCELLBI H196B, or MCELLBI H196A.

Hours & Format

Fall and/or spring: 15 weeks - 9 hours of independent study per week

Summer:

6 weeks - 23 hours of independent study per week

8 weeks - 17 hours of independent study per week

10 weeks - 14 hours of independent study per week

12 weeks - 12 hours of independent study per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

Senior Research Thesis: [Read Less](#) [-]

MCELLBI 194 Undergraduate Student Instructor for Molecular and Cell Biology Courses 1 - 2 Units

Terms offered: Fall 2018, Fall 2017

UGSIs will work under supervision of instructor and/or GSI. The UGSI will attend three hours of lecture per week where they will assist a GSI in instruction (answering questions, providing demonstrations, facilitating activities, etc.). In addition, UGSIs will meet with students from their section for zero to three hours of tutoring per week depending on the number of units. UGSIs do not evaluate students' work or assign grades. UGSIs will be graded on attendance and preparation of one lesson plan and one quiz. Required to attend any mandatory preparatory and review meetings.

Undergraduate Student Instructor for Molecular and Cell Biology

Courses: [Read More](#) [+]

Rules & Requirements

Prerequisites: Must have completed course applying to UGSI with a grade of B or better; or consent of instructor

Repeat rules: Course may be repeated for credit up to a total of 4 units.

MCELLBI 200A Fundamentals of Molecular and Cell Biology 3 Units

Terms offered: Fall 2024, Fall 2023, Fall 2022

The goal of this course is to provide graduate-level instruction on molecular and cellular biosciences from a highly-integrated systems perspective, rather than using a more classic, techniques-oriented format. A collection of approaches, and a focus on critical thinking and problem solving, will be used to show how fundamental, highly-significant biological problems are "cracked open." Reading will be assigned from a mix of classic and current peer-reviewed papers selected by the instructors.

Fundamentals of Molecular and Cell Biology: [Read More](#) [+]

Rules & Requirements

Prerequisites: 200A and 200B must be taken concurrently. Combined course required and restricted to all MCB first-year graduate students

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 4 hours of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Fundamentals of Molecular and Cell Biology: [Read Less](#) [-]

MCELLBI 201A CRISPR Gene Editing, Stem Cell and Genomic Analysis 6 Units

Terms offered: Summer 2024 Second 6 Week Session

This course seeks to develop students' foundation in critical lab skills and introduce them to the fundamental principles and technologies driving modern biomedical research. After completing MCELLBI 201A, students will have a firm understanding of CRISPR gene editing, cell culture, and genomic analysis. Students will learn the fundamentals of hypothesis-driven research, obtain critical thinking skills for data interpretation, and deliver effective written and oral reports of their results.

CRISPR Gene Editing, Stem Cell and Genomic Analysis: [Read More](#) [+]

Rules & Requirements

Prerequisites: BIOLOGY 1A and MCELLBI 102 or equivalent courses

Credit Restrictions: Students will receive no credit for MCELLBI 201A after completing MCELLBI 201A. A deficient grade in MCELLBI 201A may be removed by taking MCELLBI 201A.

Hours & Format

Summer: 6 weeks - 4 hours of lecture and 18 hours of laboratory per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

MCELLBI C205 Modern Optical Microscopy for the Modern Biologist 3 Units

Terms offered: Fall 2024, Fall 2023, Spring 2023

This course is intended for graduate students in the early stages of their thesis research who are contemplating using modern microscopy tools as part of their work. It endeavors to cut through the confusion of the wide array of new imaging methods, with a practical description of the pros and cons of each. In addition to providing an intuitive physical understanding how these microscopes work, the course will offer hands on experience with cutting-edge microscopes where students will be able to see firsthand how different imaging modalities perform on their own samples, and where they will be able to access computational tools for the visualization and analysis of their data.

Modern Optical Microscopy for the Modern Biologist: Read More [+]

Rules & Requirements

Credit Restrictions: Students will receive no credit for MCELLBI 205 after completing MCELLBI 205, or MCELLBI 205. A deficient grade in MCELLBI 205 may be removed by taking MCELLBI 205, or MCELLBI 205.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Merchant

Research Review in Biochemistry and Molecular Biology: Trace Elements in the Plant Lineage: Read Less [-]

MCELLBI 218C Research Review in Biochemistry and Molecular Biology: Synthetic Biology and Cellular Enzymology 2 Units

Terms offered: Spring 2024, Fall 2023, Spring 2023

Synthetic biology, metabolic engineering, systems biology, enzyme mechanism, and gene discovery.

Research Review in Biochemistry and Molecular Biology: Synthetic Biology and Cellular Enzymology: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor or consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Chang

Research Review in Biochemistry and Molecular Biology: Synthetic Biology and Cellular Enzymology: Read Less [-]

MCELLBI 218F Research Review in Biochemistry and Molecular Biology: Energy-dependent Proteases and Molecular Machines 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Our goals are to decipher the fundamental principles that govern substrate engagement, de-ubiquitylation, unfolding, and translocation by the proteasome.

Research Review in Biochemistry and Molecular Biology: Energy-dependent Proteases and Molecular Machines: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor or consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Martin

Research Review in Biochemistry and Molecular Biology: Energy-dependent Proteases and Molecular Machines: Read Less [-]

MCELLBI 218H Research Review in Biochemistry and Molecular Biology: Protein Synthesis in Bacteria and Mammals 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

The mechanism of protein synthesis in bacteria and human cells. Specific areas of interest include the structure and function of the ribosome and the regulation of protein synthesis.

Research Review in Biochemistry and Molecular Biology: Protein Synthesis in Bacteria and Mammals: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Cate

Research Review in Biochemistry and Molecular Biology: Protein Synthesis in Bacteria and Mammals: Read Less [-]

MCELLBI 218I Research Review in Biochemistry and Molecular Biology: Chemical Biology and Inorganic Chemistry 2 Units

Terms offered: Spring 2024, Fall 2023, Spring 2023

Research and literature topics in chemical biology and inorganic chemistry relevant to human health and disease and energy science will be discussed.

Research Review in Biochemistry and Molecular Biology: Chemical Biology and Inorganic Chemistry: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Chris Chang

Research Review in Biochemistry and Molecular Biology: Chemical Biology and Inorganic Chemistry: Read Less [-]

MCELLBI 218J Research Review in Biochemistry and Molecular Biology: Advanced 20th Century Perspectives on Cancer Cell Genetics 2 Units

Terms offered: Fall 2022, Fall 2021, Spring 2021

Transduction of cellular sequences and genetic regulation of transformation by oncogenic retroviruses as models for natural carcinogenesis, including a critical review of the current research.

Research Review in Biochemistry and Molecular Biology: Advanced 20th Century Perspectives on Cancer Cell Genetics: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Duesberg

Research Review in Biochemistry and Molecular Biology: Advanced 20th Century Perspectives on Cancer Cell Genetics: Read Less [-]

MCELLBI 218M Research Review in Molecular Mechanisms of Membrane Transport 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

In our laboratory, we study mechanisms by which molecules are transported across lipid bilayer membranes. Current research efforts to understand mechanisms of protein translocation across intracellular organelles and transport of other biomolecules will be discussed.

Research Review in Molecular Mechanisms of Membrane Transport: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Park

Research Review in Molecular Mechanisms of Membrane Transport: Read Less [-]

MCELLBI 218O Research Review in Biochemistry and Molecular Biology: Chemical Biology and Enzymology 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Topics at the interface of chemistry and biology with a particular focus on mechanisms of enzyme catalysis.

Research Review in Biochemistry and Molecular Biology: Chemical Biology and Enzymology: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Marletta

Research Review in Biochemistry and Molecular Biology: Chemical Biology and Enzymology: Read Less [-]

MCELLBI 218P Research Review in Biochemistry and Molecular Biology: Chemical Biology and Neuroscience 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Molecular approaches to designing and deploying tools for voltage imaging and brain mapping.

Research Review in Biochemistry and Molecular Biology: Chemical Biology and Neuroscience: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructors: Miller, Evan

Research Review in Biochemistry and Molecular Biology: Chemical Biology and Neuroscience: Read Less [-]

MCELLBI 218Q Research Review in Biochemistry and Molecular Biology: Single Molecular Imaging of Macromolecular Enzymes 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Yildiz laboratory combines molecular biology and single molecule biophysical techniques to understand mechanisms that underlie cellular organization and motility. Specific focuses of the lab are to dissect 1) the mechanism of cytoplasmic dynein motility, 2) the regulation of intraflagellar transport, and 3) the protection and maintenance of mammalian telomeres.

Research Review in Biochemistry and Molecular Biology: Single Molecular Imaging of Macromolecular Enzymes: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Yildiz

Research Review in Biochemistry and Molecular Biology: Single Molecular Imaging of Macromolecular Enzymes: Read Less [-]

MCELLBI 218S Research Review in Biochemistry and Molecular Biology: Cryo-Electron Microscopy of Macromolecules 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Structure-function studies of the cytoskeleton and large molecular machines by cryo-electron microscopy and image reconstruction.

Research Review in Biochemistry and Molecular Biology: Cryo-Electron Microscopy of Macromolecules: [Read More](#) [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Nogales

Research Review in Biochemistry and Molecular Biology: Cryo-Electron Microscopy of Macromolecules: [Read Less](#) [-]

MCELLBI 218T Electron Cryo-tomography of Macromolecular Complexes 2 Units

Terms offered: Spring 2023, Fall 2022, Spring 2022

Different methods for determining how the in situ structure and arrangement of macromolecular complexes influence cell morphology and

function will be discussed via literature review and implemented through lab-based research and discussions.

Electron Cryo-tomography of Macromolecular Complexes: [Read More](#) [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Davies

Electron Cryo-tomography of Macromolecular Complexes: [Read Less](#) [-]

MCELLBI 218U Research Review in Biochemistry and Molecular Biology: Epigenetic Gene Regulation 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Discussion of recent advances in the mechanism of epigenetic modifications on mammalian gene regulation and developing tools for precision editing of epigenetic modifications for controlling gene expression.

Research Review in Biochemistry and Molecular Biology: Epigenetic Gene Regulation: [Read More](#) [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Nunez

Research Review in Biochemistry and Molecular Biology: Epigenetic Gene Regulation: [Read Less](#) [-]

MCELLBI 218V Research Review in Biochemistry and Molecular Biology: Biophysics of Macromolecule Transport Across Membranes 2 Units

Terms offered: Fall 2014, Spring 2014, Fall 2013

Review of current literature and discussion of original research.

Research Review in Biochemistry and Molecular Biology: Biophysics of Macromolecule Transport Across Membranes: [Read More](#) [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Krantz

Research Review in Biochemistry and Molecular Biology: Biophysics of Macromolecule Transport Across Membranes: [Read Less](#) [-]

MCELLBI 218X Research Review in Biochemistry and Molecular Biology: Chemical Reactions of Metabolism 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Define how metabolic reactions function in the context of the cellular system in order to elucidate the so-called design principles of metabolic function.

Research Review in Biochemistry and Molecular Biology: Chemical Reactions of Metabolism: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Savage

Research Review in Biochemistry and Molecular Biology: Chemical Reactions of Metabolism: Read Less [-]

MCELLBI 219A Structural Membrane Biology 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

The mechanisms by which protein complexes use their structures to bud, bend, and sever membranes will be covered in research reports and reviews of the current literature and in discussion of current experiments in the field.

Structural Membrane Biology: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Hurley

Structural Membrane Biology: Read Less [-]

MCELLBI 219B Regulation of Translation 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Understanding the molecular basis and physiological role of translational regulation in gene expression with an emphasis on global profiling and functional genomics.

Regulation of Translation: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Ingolia

Regulation of Translation: Read Less [-]

MCELLBI 219H Research Review in Biochemistry and Molecular Biology: Molecular and Cell Biology of Listeria monocytogenes Pathogenesis 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Discussion of recent research on the genetics, cell biology, and immunology of the model facultative intracellular bacterial pathogen, Research Review in Biochemistry and Molecular Biology: Molecular and Cell Biology of Listeria monocytogenes Pathogenesis: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Portnoy

Research Review in Biochemistry and Molecular Biology: Molecular and Cell Biology of Listeria monocytogenes Pathogenesis: Read Less [-]

MCELLBI 219K Research Review in Chemical Biology, Synthetic Biology, Organic Chemistry and Biophysics 2 Units

Terms offered: Spring 2021, Spring 2002, Fall 2001

Discussion of recent research on chemical biology, synthetic biology, organic chemistry and biophysics.

Research Review in Chemical Biology, Synthetic Biology, Organic Chemistry and Biophysics: [Read More \[+\]](#)

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Schepartz

Research Review in Chemical Biology, Synthetic Biology, Organic Chemistry and Biophysics: [Read Less \[-\]](#)

MCELLBI 219S Research Review in Biochemistry and Molecular Biology: Structural Biology of Signaling and Replication 2 Units

Terms offered: Spring 2024, Fall 2023, Spring 2023

Mechanisms and structure in DNA replication and eukaryotic cell signaling.

Research Review in Biochemistry and Molecular Biology: Structural Biology of Signaling and Replication: [Read More \[+\]](#)

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Kuriyan

Research Review in Biochemistry and Molecular Biology: Structural Biology of Signaling and Replication: [Read Less \[-\]](#)

MCELLBI 219U Research Review in Biochemistry and Molecular Biology: Single Molecule Biophysics 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Methods of single molecule manipulation and visualization that are used to characterize the structure and mechanochemical properties of translocating DNA binding protein such as RNA polymerase and to investigate the mechanical denaturation of single protein molecules will be covered in research reports and reviews of the current literature and in discussion of current experiments in the field.

Research Review in Biochemistry and Molecular Biology: Single Molecule Biophysics: [Read More \[+\]](#)

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Bustamante

Research Review in Biochemistry and Molecular Biology: Single Molecule Biophysics: [Read Less \[-\]](#)

MCELLBI 219Y Research Review in Biochemistry and Molecular Biology: Regulation of HIV Gene Expression 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Regulation of HIV gene expression by viral proteins and cellular cofactors will be covered in research reports and reviews of the current literature and in discussion of current experiments in the field.

Research Review in Biochemistry and Molecular Biology: Regulation of HIV Gene Expression: [Read More \[+\]](#)

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Zhou

Research Review in Biochemistry and Molecular Biology: Regulation of HIV Gene Expression: [Read Less \[-\]](#)

MCELLBI 219Z Research Review in Biochemistry and Molecular Biology: Polymerase and RNA Biochemistry and Biology 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Emphasizes eukaryotic retroelement reverse transcriptases and retroelement mobility.

Research Review in Biochemistry and Molecular Biology: Polymerase and RNA Biochemistry and Biology: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Collins

Research Review in Biochemistry and Molecular Biology: Polymerase and RNA Biochemistry and Biology: Read Less [-]

MCELLBI 220 Therapeutic Modalities 4 Units

Terms offered: Spring 2024

This class is designed to introduce graduate students to a range of therapeutic modalities that are in development or use. It will focus on small molecules, genomic therapies (including genome editing), and biologics. This class will present different applications of small molecules, RNA or DNA therapeutics, and biologics and discuss both advantages and challenges in their clinical use.

Therapeutic Modalities: Read More [+]

Rules & Requirements

Prerequisites: For MCB students, MCELLBI 200A and MCELLBI 200B are prerequisites for this class. Students outside of MCB should check with the head instructor whether they have the required background to follow this class most productively

Credit Restrictions: Students will receive no credit for MCELLBI 220 after completing MCELLBI 220. A deficient grade in MCELLBI 220 may be removed by taking MCELLBI 220.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Letter grade.

Instructor: Olzmann

Therapeutic Modalities: Read Less [-]

MCELLBI 227 Science Writing and Professional Development 2 Units

Terms offered: Fall 2024

The overarching goal of this course is to provide students with professional skills in scientific reading, scientific writing, creating a CV or resume and cover letters and understanding the structures of academic institutions and biotech companies. In addition, the class will provide career advice for students entering the academic or biotech work places. Science Writing and Professional Development: Read More [+]

Rules & Requirements

Prerequisites: This course will be limited to students enrolled in the MCB Master of Biotechnology program

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Letter grade.

Instructor: Beatty

Science Writing and Professional Development: Read Less [-]

MCELLBI 229A Research Review in Viruses as Models for Eukaryote Gene Expression and Replication 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Recent developments in eukaryote viral and cellular regulation. New concepts in transcription and RNA replication, with particular emphasis on virus-cell interactions.

Research Review in Viruses as Models for Eukaryote Gene Expression and Replication: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor or consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Botchan

Formerly known as: Molecular and Cell Biology 218E

Research Review in Viruses as Models for Eukaryote Gene Expression and Replication: Read Less [-]

MCELLBI 229B Research Review in Molecular Therapeutics: Imaging Single Molecules: Fashion or Game Changer? 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Research review in genetics, genomics and development. We will explore how the detection of single particles

(DNA, RNA, proteins) can help with understanding cellular organization and

enzymatic processes dynamics and kinetics. Most of the experiments described will be drawn from the gene expression and nuclear organization

literature.

Research Review in Molecular Therapeutics: Imaging Single Molecules:

Fashion or Game Changer?: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Darzacq

Formerly known as: Molecular and Cell Biology 249L

Research Review in Molecular Therapeutics: Imaging Single Molecules: Fashion or Game Changer?: Read Less [-]

MCELLBI 229C Research Review in Molecular Therapeutics: Structure and Function of RNA 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

RNA structure, folding, and function. Specific topics include ribozyme mechanisms, RNA-mediated translation initiation, and protein targeting and secretion.

Research Review in Molecular Therapeutics: Structure and Function of RNA: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Doudna

Formerly known as: Molecular and Cell Biology 219J

Research Review in Molecular Therapeutics: Structure and Function of RNA: Read Less [-]

MCELLBI 229D Research Review in Molecular Therapeutics: Diseases/Retina 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Evaluation of current research in molecular mechanisms underlying diseases of the retina.

Research Review in Molecular Therapeutics: Diseases/Retina: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Flannery

Formerly known as: Molecular and Cell Biology 269U

Research Review in Molecular Therapeutics: Diseases/Retina: Read Less [-]

MCELLBI 229E Research Review in Molecular Therapeutics: The Protein Folding Problem 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Protein structure, stability, design, and the pathway of protein folding.

Research Review in Molecular Therapeutics: The Protein Folding

Problem: [Read More](#) [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Marqusee

Formerly known as: Molecular and Cell Biology 218R

Research Review in Molecular Therapeutics: The Protein Folding

Problem: [Read Less](#) [-]

MCELLBI 229F Research Review in Molecular Therapeutics: Virus-Host Interactions 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Understanding the creative strategies viruses use to manipulate gene expression in host cells, with a focus on RNA-based regulation of gene expression.

Research Review in Molecular Therapeutics: Virus-Host Interactions:

[Read More](#) [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Glaunsinger

Formerly known as: Molecular and Cell Biology 219G

Research Review in Molecular Therapeutics: Virus-Host Interactions:

MCELLBI 229G Mapping Metabolic Drivers of Disease using Chemoproteomic and Metabolomic Platforms 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

We will discuss current research in the following three areas: 1) mapping metabolic drivers of human diseases using chemoproteomic and metabolomic platforms; 2) expanding the druggable proteome through mapping and pharmacologically interrogating proteome-wide

hyper-reactive and ligandable hotspots; 3) mapping proteome-wide targets of environmental and pharmaceutical chemicals towards understanding novel toxicological mechanisms.

Mapping Metabolic Drivers of Disease using Chemoproteomic and Metabolomic Platforms: [Read More](#) [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Nomura

Formerly known as: Molecular and Cell Biology 218A

Mapping Metabolic Drivers of Disease using Chemoproteomic and Metabolomic Platforms: [Read Less](#) [-]

MCELLBI 229H Research Review in Molecular Therapeutics: Mechanisms of lipid homeostasis and lipotoxicity 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Discussion of recent literature and original research. Current research examines the cell biology of lipid homeostasis, including the mechanisms that regulate lipid droplet biogenesis, oxidative lipid damage, and ferroptosis.

Research Review in Molecular Therapeutics: Mechanisms of lipid homeostasis and lipotoxicity: [Read More](#) [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Olzmann

Formerly known as: Molecular and Cell Biology 239A

Research Review in Molecular Therapeutics: Mechanisms of lipid homeostasis and lipotoxicity: [Read Less](#) [-]

MCELLBI 229I Research Review in Molecular Therapeutics: Regulation of the Cell Cycle 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Review of current literature and discussion of original research.

Research Review in Molecular Therapeutics: Regulation of the Cell Cycle: [Read More](#) [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Rape

Formerly known as: Molecular and Cell Biology 239B

Research Review in Molecular Therapeutics: Regulation of the Cell Cycle: [Read Less](#) [-]

MCELLBI 229J Research Review in Understanding and Exploiting Complex Biological Processes and Machines 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Covers aspects of ribosome engineering, organelle imaging and interactions, protein delivery, and cell signaling.

Research Review in Understanding and Exploiting Complex Biological Processes and Machines: [Read More](#) [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Schepartz

Formerly known as: Molecular and Cell Biology 218N

Research Review in Understanding and Exploiting Complex Biological Processes and Machines: [Read Less](#) [-]

MCELLBI 229K Research Review in Molecular Therapeutics: Eukaryotic Gene Expression 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Protein-DNA interactions and the control of gene expression in eukaryotes.

Research Review in Molecular Therapeutics: Eukaryotic Gene Expression: [Read More](#) [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Tjian

Formerly known as: Molecular and Cell Biology 219F

Research Review in Molecular Therapeutics: Eukaryotic Gene Expression: [Read Less](#) [-]

MCELLBI 229L Research Review in Molecular Therapeutics: Structure and Function of the Human Epigenome 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Research focuses on (i) understanding the interplay between regulatory information encoded in the primary sequence of the human genome and epigenomic information inscribed by the joint action of trans-acting factors, chromatin remodelers, modifiers, and readers that yields a particular functional state in primary cells of the immune and central nervous systems; (ii) leveraging this understanding to engineer novel architectures for targeted epigenome editors customized for use in these and other clinically relevant human cell types; (iii) establishing preclinical proof-of-concept for the use of the resulting epigenome-editing molecular therapeutics in ex vivo and in vivo models of autoimmune and neurologic disease.

Research Review in Molecular Therapeutics: Structure and Function of the Human Epigenome: [Read More \[+\]](#)

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Urnov

Formerly known as: Molecular and Cell Biology 249AA

MCELLBI 230 Advanced Cell and Developmental Biology 4 Units

Terms offered: Spring 2024, Spring 2023, Spring 2022

This course will discuss modern concepts of cell and developmental biology, with a strong emphasis on regulatory mechanisms at different length-scales (intermolecular, intracellular and intercellular). It will cover methods of quantitative, single-cell, and organismal biology in cell lines, stem cells, and model organisms. A solid foundation of core cell biology concepts, such as the cell cycle, cytoskeleton, or vesicle transport, is strongly recommended.

Advanced Cell and Developmental Biology: [Read More](#) [+]

Rules & Requirements

Prerequisites: 130. Formal consent of instructors required, except for MCB graduate students and graduate students in the laboratories of MCB faculty

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Letter grade.

Advanced Cell and Developmental Biology: [Read Less](#) [-]

MCELLBI 231 Advanced Developmental and Stem Cell Biology 4 Units

Terms offered: Spring 2018, Spring 2017, Spring 2015

Principles of animal development will be set forth from the classical and recent experimental analysis of induction, localization, patterning mutants, axis formation, regional gene expression, and cell interactions. Early development of selected vertebrates and invertebrates will be examined, and emerging topics in microRNA and stem cell biology will be highlighted. A weekly discussion section with readings from the research literature is required.

Advanced Developmental and Stem Cell Biology: [Read More](#) [+]

Rules & Requirements

Prerequisites: Previous course in development (131 or equivalent) or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1-2 hours of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Letter grade.

Advanced Developmental and Stem Cell Biology: [Read Less](#) [-]

MCELLBI 236 Advanced Mammalian Physiology 5 Units

Terms offered: Fall 2024, Fall 2023, Fall 2022

Principles of mammalian (primarily human) physiology emphasizing physical, chemical, molecular, and cellular bases of functional biology. The following topics will be covered: cellular and membrane ion and nonelectrolyte transport; cell and endocrine regulation; autonomic nervous system regulation; skeletal, smooth, and cardiac muscle; cardiovascular physiology; respiration; renal physiology; gastrointestinal physiology. Discussion section will study advanced physiological topics, including: presentations by the faculty; problem sets; discussion of the primary literature and of reviews; two presentations by each student on topics in current physiological research.

Advanced Mammalian Physiology: [Read More](#) [+]

Rules & Requirements

Prerequisites: Consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Letter grade.

Advanced Mammalian Physiology: [Read Less](#) [-]

MCELLBI 237L Advanced Physical Biology of the Cell 4 Units

Terms offered: Spring 2024, Spring 2022, Spring 2020

Biology is being revolutionized by new experimental techniques that have made it possible to measure the inner workings of molecules, cells and multicellular organisms with unprecedented precision. The objective of this course is to explore this deluge of quantitative data through the use of biological numeracy. We will develop theoretical models that make precise predictions about biological phenomena. These predictions will be tested through the hands-on analysis of experimental data and by performing numerical simulations using Matlab. A laptop is required for this course, but no previous programming experience is required.

Advanced Physical Biology of the Cell: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of laboratory per week

Summer: 8 weeks - 6 hours of lecture and 2 hours of laboratory per week

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Letter grade.

Instructor: Garcia

Advanced Physical Biology of the Cell: Read Less [-]

MCELLBI C237 Stem Cells and Directed Organogenesis 3 Units

Terms offered: Spring 2015, Spring 2014, Spring 2013

This course will provide an overview of basic and applied embryonic stem cell (ESC) biology. Topics will include early embryonic development, ESC laboratory methods, biomaterials for directed differentiation and other stem cell manipulations, and clinical uses of stem cells.

Stem Cells and Directed Organogenesis: Read More [+]

Rules & Requirements

Prerequisites: Consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 6 hours of laboratory and 1 hour of lecture per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Letter grade.

Instructor: Conboy

Also listed as: BIO ENG C218

Stem Cells and Directed Organogenesis: Read Less [-]

MCELLBI 238 Stem Cell Research and Gene Therapy: Questions, Solutions and Current Frontiers 1 Unit

Terms offered: Fall 2023, Fall 2022

This lecture series will cover modern approaches to stem cell biology, regenerative medicine and gene therapy. Lectures will include a broad introduction to the day's topic, followed by in depth discussion of one specific recent example- preferably from the speaker's own laboratory- that addresses an imminent question in the field. Relevant research articles will be assigned as background reading. Students are expected to become thoroughly familiar with these materials prior to each class meeting.

Stem Cell Research and Gene Therapy: Questions, Solutions and Current Frontiers: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 1 hour of lecture and 1 hour of discussion per week

MCELLBI 239C The Regulation of Meiotic Gene Expression and Cellular Morphogenesis 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

The mechanisms that link cellular differentiation programs and dynamic gene regulation in complex eukaryotic systems remain mysterious.

Such programs drive diverse and central biological processes including organismal development, immune function, disease progression, and meiosis. This course is focused on the molecular basis for the cellular remodeling accompanying meiosis, the highly conserved process by which gametes are produced.

The Regulation of Meiotic Gene Expression and Cellular Morphogenesis: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Letter grade.

Instructors: Koshland, Meyer

Advanced Genetic Analysis: Read Less [-]

MCELLBI C242 CTEG Evolution, Genetics, and Genomics Seminar 1 Unit

Terms offered: Fall 2024, Spring 2024, Fall 2023

This graduate seminar consists of weekly presentations from Berkeley graduate students as well as outside speakers on topics surrounding evolution, genetics, and genomics. Many labs spread across different departments have research programs focused on evolution, genetics, and genomics. However, it can be challenging to keep abreast of this research and to identify potential collaborations due to the dispersion of labs across different departments and specialties. The Center for Theoretical and Evolutionary Genetics (CTEG) is an informal group of labs that collectively work on genetics and genomics. The seminar seeks to provide a common space for graduate students to present their research and learn about the research of their colleagues.

CTEG Evolution, Genetics, and Genomics Seminar: Read More [+]

Rules & Requirements

Prerequisites: Graduate standing

Repeat rules: Course may be repeated for credit without restriction.

CTEG Evolution, Genetics, and Genomics Seminar: Read Less [-]

MCELLBI C243 Seq: Methods and Applications 3 Units

Terms offered: Spring 2015, Spring 2014

A graduate seminar class in which a group of students will closely examine recent computational methods in high-throughput sequencing followed by directly examining interesting biological applications thereof.

Seq: Methods and Applications: Read More [+]

Rules & Requirements

Prerequisites: Graduate standing in Math, MCB, and Computational Biology; or consent of the instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Letter grade.

Instructor: Pachter

Also listed as: MATH C243

Seq: Methods and Applications: Read Less [-]

MCELLBI C244 Discrete Mathematics for the Life Sciences 4 Units

Terms offered: Spring 2013

Introduction to algebraic statistics and probability, optimization, phylogenetic combinatorics, graphs and networks, polyhedral and metric geometry.

Discrete Mathematics for the Life Sciences: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Letter grade.

Also listed as: MATH C239

Discrete Mathematics for the Life Sciences: Read Less [-]

MCELLBI 249A Research in Genetics and Development: From Sequence to Function in Transcription Factors 2 Units

Terms offered: Fall 2024, Spring 2024, Spring 2014

This course explores experimental and computational approaches to studying the sequence to function relationships of intrinsically disordered proteins. Emphasis on the activation domains of transcription factors. High-throughput experiments, machine learning, evolutionary comparisons, and all atom simulations will be discussed. Additional emphasis will be placed on characterizing the functional consequences of patient mutations in activation domains.

Research in Genetics and Development: From Sequence to Function in Transcription Factors: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Staller

Research in Genetics and Development: From Sequence to Function in Transcription Factors: Read Less [-]

MCELLBI 249BB Research Review in Genetics and Development: Aging and Protein Homeostasis 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Central to the aging process is the unfolding of the proteome. Specific areas under study include cellular responses to protein misfolding and coordination of these responses across an organism.

Research Review in Genetics and Development: Aging and Protein Homeostasis: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Dillin

Research Review in Genetics and Development: Aging and Protein Homeostasis: Read Less [-]

MCELLBI 249C Research Review in Genetics and Development: Nucleic Acid-Protein Interactions and Control of Gene Expression 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Biochemical and molecular genetic aspects of eukaryotic messenger RNA splicing and transposition, with an emphasis on an experimental system.

Research Review in Genetics and Development: Nucleic Acid-Protein Interactions and Control of Gene Expression: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Rio

Research Review in Genetics and Development: Nucleic Acid-Protein Interactions and Control of Gene Expression: Read Less [-]

MCELLBI 249D Research Review in Genetics and Development: Mechanisms of Genetic Regulation in Yeast 2 Units

Terms offered: Fall 2023, Spring 2023, Fall 2022

Genes, gene products and molecular mechanisms that control cell types in the unicellular eukaryote .

Research Review in Genetics and Development: Mechanisms of Genetic Regulation in Yeast: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Rine

Research Review in Genetics and Development: Mechanisms of Genetic Regulation in Yeast: Read Less [-]

MCELLBI 249F Research Review in Genetics and Development: Neuronal Development 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Molecular and genetic approaches to the problem of how neurons develop, with emphasis on and .

Research Review in Genetics and Development: Neuronal Development: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Garriga

Research Review in Genetics and Development: Neuronal Development: Read Less [-]

MCELLBI 249G Research Review in Genetics and Development: Developmental and Evolutionary Genetics 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

We study how genes control pattern formation during development and pattern modification during evolution.

Research Review in Genetics and Development: Developmental and Evolutionary Genetics: [Read More \[+\]](#)

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Miller

Research Review in Genetics and Development: Developmental and Evolutionary Genetics: [Read Less \[-\]](#)

MCELLBI 249H Investigating Cellular Aging and Chromosome Segregation during Gametogenesis 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

This course focuses on understanding 1) how cellular aging is affected during gametogenesis, the developmental program that produces gametes for sexual reproduction and 2) how chromosome segregation is regulated during meiosis, the specialized cell division that generates gametes.

Investigating Cellular Aging and Chromosome Segregation during Gametogenesis: [Read More \[+\]](#)

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Unal

Investigating Cellular Aging and Chromosome Segregation during Gametogenesis: [Read Less \[-\]](#)

MCELLBI 249HH Research Review in Genetics and Development: Human Population Genetics and Evolutionary Biology 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Research focuses on use of statistical and computational approaches to study questions in human genetics and evolutionary biology. This includes, but is not limited to, studying (1) how different evolutionary processes such as mutation rate evolve across primates, (2) when key events (such as introgression and adaptations) occurred in human history, and (3) how we can leverage large-scale datasets to identify genetic variants related to human adaptation and disease.

Research Review in Genetics and Development: Human Population Genetics and Evolutionary Biology: [Read More \[+\]](#)

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Moorjani

Research Review in Genetics and Development: Human Population Genetics and Evolutionary Biology: [Read Less \[-\]](#)

MCELLBI 249I Research Review in Genetics and Development: RNA Systems Biology 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

How does the sequence of an RNA determine its post-transcriptional regulation? Genomic and systems biology investigations of alternative splicing, translation, and other post-transcriptional regulatory processes. Research Review in Genetics and Development: RNA Systems Biology: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Lareau

Research Review in Genetics and Development: RNA Systems Biology: Read Less [-]

MCELLBI 249J Research Review in Genetics and Development: Developmental and Molecular Genetics of *C. elegans* 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Molecular and genetical analysis of sex determination and dosage compensation in the nematode .

Research Review in Genetics and Development: Developmental and Molecular Genetics of *C. elegans*: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Meyer

Research Review in Genetics and Development: Developmental and Molecular Genetics of *C. elegans*: Read Less [-]

MCELLBI 249K Research Review in Genetics and Development: Animal Origins 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Evaluation of current research on choanoflagellates, sponges, and animal origins. Intended to complement ongoing research for graduate students. Research Review in Genetics and Development: Animal Origins: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: King

Research Review in Genetics and Development: Animal Origins: Read Less [-]

MCELLBI 249M Research Review in Genetics and Development: *Saccharomyces Cerevisiae* Microtubule Cytoskeleton 2 Units

Terms offered: Fall 2023, Spring 2023, Fall 2022

Review of current literature and discussion of current research.

Research Review in Genetics and Development: *Saccharomyces*

Cerevisiae Microtubule Cytoskeleton: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Barnes

Research Review in Genetics and Development: *Saccharomyces* *Cerevisiae* Microtubule Cytoskeleton: Read Less [-]

MCELLBI 249MM Physical Biology of Living Organisms 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Research review in genetics, genomics and development. In development a single cell goes through a series of repeated divisions and these cells read the program encoded in their DNA in order to become

familiar cell types such as those found in muscle, liver, or our brains. The goal of our lab is to uncover the rules behind these decisions with the objective of predicting and manipulating developmental programs from just

looking at DNA sequence. In order to reach this predictive understanding we

combine physics, synthetic biology, and new technologies to query and control developmental decisions in real time at the single cell level in the fruit fly embryo.

Physical Biology of Living Organisms: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Garcia

Physical Biology of Living Organisms: Read Less [-]

MCELLBI 249O Research Review in Genetics and Development: Genome Sequences 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Biochemistry, cancer biology and virology, cell biology, computational biology, genetics, microbiology, molecular and cell physiology.

Research Review in Genetics and Development: Genome Sequences: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Eisen

Research Review in Genetics and Development: Genome Sequences: Read Less [-]

MCELLBI 249P Research Review in Genetics and Development: Evolution of Genome Structure and Cellular Diversity 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Review of current literature and discussion of original research in the evolution of genome structure, aging, and cellular and organismal diversity.

Research Review in Genetics and Development: Evolution of Genome Structure and Cellular Diversity: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Sudmant

Research Review in Genetics and Development: Evolution of Genome Structure and Cellular Diversity: Read Less [-]

MCELLBI 249Q Research Review in Genetics and Development: Computational Genomics 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Recent developments in computational methods for genomics and their application for understanding the structure and function of genes encoded in completely sequenced genomes.

Research Review in Genetics and Development: Computational Genomics: [Read More](#) [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Brenner

Research Review in Genetics and Development: Computational Genomics: [Read Less](#) [-]

MCELLBI 249R Research Review in Genetics and Development: Vertebrate development and tissue regeneration 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Topics on gene regulatory network control of neural crest cell differentiation during development, vertebrate evolution, and tissue regeneration will be discussed.

Research Review in Genetics and Development: Vertebrate development and tissue regeneration: [Read More](#) [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Martik

Research Review in Genetics and Development: Vertebrate development and tissue regeneration: [Read Less](#) [-]

MCELLBI 249T Research Review in Genetics, Genomics and Development: Evolution of Genomes 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Comparative analysis of eukaryotic genomes to inform the origins and diversification of animals and plants.

Research Review in Genetics, Genomics and Development: Evolution of Genomes: [Read More](#) [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Rokhsar

Research Review in Genetics, Genomics and Development: Evolution of Genomes: [Read Less](#) [-]

MCELLBI 249V Research Review in Genetics and Development: Induction in Vertebrate Development and ES Cell Differentiation 2 Units

Terms offered: Fall 2023, Spring 2023, Fall 2022

The Roelink laboratory is interested in the mechanisms of embryonic induction, the phenomenon in which a group of cells changes the developmental fate of neighboring cells via the release of inducers.

Research Review in Genetics and Development: Induction in Vertebrate Development and ES Cell Differentiation: [Read More](#) [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Roelink

Research Review in Genetics and Development: Induction in Vertebrate Development and ES Cell Differentiation: [Read Less](#) [-]

MCELLBI 249W Research Review in Genetics and Development: Archaeal Genetics and Methane Metabolism 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Discussions pertaining to the development of new genetic tools for archaeal model organisms with a particular emphasis on methane metabolizing archaea in order to characterize their physiology, evolution and metabolism.

Research Review in Genetics and Development: Archaeal Genetics and Methane Metabolism: [Read More](#) [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Nayak

Research Review in Genetics and Development: Archaeal Genetics and Methane Metabolism: [Read Less](#) [-]

MCELLBI 249Y Research Review in Genetics and Development: Mechanisms of Gene Control in Vertebrate Animals 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

This course will focus on mechanisms of gene control in vertebrate animals, particularly in the area of vertebrate development. Amphibian egg formation, mesoderm induction, neural induction, and patterning of the nervous system at the molecular level. Control of transcription, post-transcriptional control of gene expression (including control of RNA turnover and RNA localization).

Research Review in Genetics and Development: Mechanisms of Gene Control in Vertebrate Animals: [Read More](#) [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Harland

Formerly known as: 218Y

Research Review in Genetics and Development: Mechanisms of Gene Control in Vertebrate Animals: [Read Less](#) [-]

MCELLBI 249Z Research Review in Genetics and Development: Chromosome Structure and Integrity, Genome Evolution 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Use of genetic, cell biological, and biochemical approaches in budding yeast to understand genome integrity, genome evolution, and most recently desiccation tolerance.

Research Review in Genetics and Development: Chromosome Structure and Integrity, Genome Evolution: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Koshland

Research Review in Genetics and Development: Chromosome Structure and Integrity, Genome Evolution: Read Less [-]

MCELLBI 250 Advanced Immunology 4 Units

Terms offered: Spring 2024, Spring 2023, Spring 2022

Molecular and cellular analysis of the immune response emphasizing concepts and methodology. Innate immunity, pathogen sensors, antibodies and T cell receptors, lymphocyte activation, tolerance and selection. Antigen processing, T cell subtypes, and T regulatory cells. NK cells, tumor surveillance, and AIDS.

Advanced Immunology: Read More [+]

Rules & Requirements

Prerequisites: 100, 110, 140, 150 or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Letter grade.

Advanced Immunology: Read Less [-]

MCELLBI 251 The Regulation of Immune System Development and Function 1 Unit

Terms offered: Spring 2022, Spring 2021, Fall 2020

This is an advanced seminar course which will consider current research questions and experimental approaches in molecular and cellular immunology. Each registrant will present a 30-minute research talk describing the problems they are studying, the approach they are taking, their preliminary data, and technical problems. Other course participants (including basic immunology faculty) will provide criticism and suggestions.

The Regulation of Immune System Development and Function: Read More [+]

Rules & Requirements

Prerequisites: 250 or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 1 hour of lecture per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Winoto

The Regulation of Immune System Development and Function: Read Less [-]

MCELLBI 259A Mycobacterium Tuberculosis (Mtb) 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

The TB field has entered a new era with the convergence of genetic tools, genome sequencing, bioinformatics, advanced imaging techniques, animal models of infection, and high-throughput assays that allow us to study this multi-faceted interaction between Mtb and its host. We use all of these tools to probe the molecular and cellular events that enable M. tuberculosis to evade host defense mechanisms.

Mycobacterium Tuberculosis (Mtb): Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Cox

Mycobacterium Tuberculosis (Mtb): Read Less [-]

MCELLBI 259C Research Review in Immunology and Pathogenesis: Nuclear Receptor-Mediated Regulation of Neuroinflammation 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

In this course we will discuss our research as well as recent literatures focusing on understanding of 1) How is homeostasis in the CNS regulated by innate immune functions of microglia? 2) How can we intervene in dysfunction of microglia-mediated immune functions using NRs signaling and transcription?

Research Review in Immunology and Pathogenesis: Nuclear Receptor-Mediated Regulation of Neuroinflammation: [Read More](#) [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Saijo

Research Review in Immunology and Pathogenesis: Nuclear Receptor-Mediated Regulation of Neuroinflammation: [Read Less](#) [-]

MCELLBI 259D Research Review in Immunology and Pathogenesis: Mycobacterial Biology and Host-Pathogen Interactions 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

We will discuss macrophage biology and innate immunity in the context of infection with *Mycobacterium tuberculosis* through discussion of current research from the Stanley Lab and both cutting edge and classic literature in relevant fields.

Research Review in Immunology and Pathogenesis: Mycobacterial Biology and Host-Pathogen Interactions: [Read More](#) [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Coscoy

Research Review in Immunology and Pathogenesis: Immune Evasion by Viruses: [Read Less](#) [-]

MCELLBI 259K Research Review in Immunology and Pathogenesis: Epigenetic Control for Regulatory T Cell Function in Cancer and Autoimmunity 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Intersecting the fields of cancer biology, immunology, and epigenetics to strengthen our own immune defense mechanisms against our own cancers by reprogramming T cell function specifically within the tumor microenvironment.

Research Review in Immunology and Pathogenesis: Epigenetic Control for Regulatory T Cell Function in Cancer and Autoimmunity: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Dupage

Research Review in Immunology and Pathogenesis: Epigenetic Control for Regulatory T Cell Function in Cancer and Autoimmunity: Read Less [-]

MCELLBI 259M Research Review in Immunology and Pathogenesis: Innate Immunity and Innate Control of Adaptive Immunity 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Innate immunity and innate control of adaptive immunity.

Research Review in Immunology and Pathogenesis: Innate Immunity and Innate Control of Adaptive Immunity: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Barton

Research Review in Immunology and Pathogenesis: Innate Immunity and Innate Control of Adaptive Immunity: Read Less [-]

MCELLBI 259N Research Review in Immunology and Pathogenesis: Immunology, Microbiology, and Genetics of Bacterial Pathogenesis 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Role of innate host responses in defense against intracellular bacterial pathogens.

Research Review in Immunology and Pathogenesis: Immunology, Microbiology, and Genetics of Bacterial Pathogenesis: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Vance

Research Review in Immunology and Pathogenesis: Immunology, Microbiology, and Genetics of Bacterial Pathogenesis: Read Less [-]

MCELLBI 259O Research Review in Immunology and Pathogenesis: Circadian rhythms in Parasitic Diseases 2 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

We will discuss circadian rhythms research, at the behavioral, tissue and molecular scales. Our main focus is the circadian regulation of gene expression and its impact in host physiology. We will also focus on malaria and sleeping sickness infections, understanding the clinical aspects, the immune response to parasites and the vector transmission.

Research Review in Immunology and Pathogenesis: Circadian rhythms in Parasitic Diseases: Read More [+]

Rules & Requirements

Prerequisites: Enrollment is restricted to students conducting research in the laboratory of the instructor, or requires consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

MCELLBI 275 Therapeutics Development in Biotech: Financing, Regulation and Social Ethics 2 Units

Terms offered: Fall 2024

This course offers an introduction to the field of biotechnology and will cover the history of the field, its impact on medicine and society, key methodologies, important therapeutic areas, and the range of career options available in the biopharmaceutical industry. Students will hear from lecturers with expertise ranging from molecular biology to clinical trial design and interpretation and be given an integrated overview of a complex area. Students will actively participate in experiential learning about relevant topics and presenting their findings in class, which will deepen understanding. There will be interactive elements, using a Socratic discussion format. Students are expected to participate actively. Therapeutics Development in Biotech: Financing, Regulation and Social Ethics: [Read More](#) [+]

Rules & Requirements

Prerequisites: Students must be enrolled in the Master of Biotechnology program

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture per week

MCELLBI C277 Communicating Quantitative Information 2 Units

Terms offered: Fall 2021, Spring 2020, Spring 2019

This course will cover several aspects of communicating quantitative information, with a primary focus on visualizations for publications, presentations, and posters. Other topics include sharing of data and analyses, such as new publication models and interactive notebooks, as well as lifecycle data management and publication. Primary discussion will be on conceptual issues, and students will be expected to use various systems and resources as self-directed homestudy.

Communicating Quantitative Information: [Read More](#) [+]

Hours & Format

Fall and/or spring: 15 weeks - 1.5 hours of seminar and 1.5 hours of discussion per week

MCELLBI 288 Data Science for Molecular and Cell Biology 3 Units

Terms offered: Spring 2022, Spring 2021, Spring 2020

Data science is rapidly becoming a critical skill for molecular and cell biologists. This course provides a survey of data science concepts and methods, including practical statistical inference and modeling, data visualization and exploration, elementary machine learning, and simulation. The course is practically oriented. Diverse real-world datasets, along with simulated data, will be used to develop skills and intuition.

Data Science for Molecular and Cell Biology: Read More [+]

Rules & Requirements

Prerequisites: Graduate standing in the biological sciences or permission from instructors. Prior introductory exposure to programming is desired, e.g., through Data Science 8, MCB Python “boot camp,” or self taught from introductory programming tutorials. Please see <http://python.berkeley.edu/resources/> for suggested resources. No prior statistics is assumed. The course is not suitable for students with advanced training in statistics or machine learning

Repeat rules: Course may be repeated for credit with instructor consent.

Hours & Format

Fall and/or spring: 15 weeks - 4 hours of lecture per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructors: Rokhsar, Eisen

Data Science for Molecular and Cell Biology: Read Less [-]

MCELLBI 289 Master of Biotechnology Capstone Course 5 Units

Terms offered: Not yet offered

This capstone course fosters collaborative learning by bringing together students each week to discuss their internship project that they have been working on individually or in small groups under the supervision of their internship mentor. Students are encouraged to apply critical thinking skills to evaluate other projects and to provide constructive feedback. Students will work towards a final written report and oral presentation. They will identify and present a technology overview, explanation of unmet need, a central working hypothesis, a plan to test said hypothesis, execution of their plan, and a final research product. The final presentation will be in a poster presentation format.

Master of Biotechnology Capstone Course: Read More [+]

Rules & Requirements

Prerequisites: MCELLBI 201A and MCELLBI 201B. Students must be enrolled in the Master of Biotechnology program

Hours & Format

Fall and/or spring: 15 weeks - 5 hours of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Letter grade.

Instructor: Luo

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Sharma

Rigor and Reproducibility in Research: Read Less [-]

MCELLBI 293R Responsible Conduct of Research Refresher 1 Unit

Terms offered: Prior to 2007

This refresher course will cover topics in responsible conduct in research drawing from case studies of the Association of American Medical Colleges and the NIH. Students will review case studies in preparation for class discussion. Required of all 4th year MCB graduate students funded on NIH training grants.

Responsible Conduct of Research Refresher: Read More [+]

Objectives & Outcomes

Course Objectives: Collaborative research including collaborations with industry

Data acquisition and laboratory tools; management, sharing and ownership

Mentor/mentee responsibilities and relationships

Policies regarding human subjects, live vertebrate animal subjects in research, and safe laboratory practices

Research misconduct and policies for handling misconduct

Responsible authorship and publication

The scientist as a responsible member of society, contemporary ethical issues in biomedical research, and

the environmental and societal impacts of scientific research

Rules & Requirements

Prerequisites: Consent of instructor. Must be a 4th year MCB graduate student

Hours & Format

Fall and/or spring: 15 weeks - 1 hour of seminar per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Instructor: Sharma

Responsible Conduct of Research Refresher: Read Less [-]

MCELLBI 293S Foundations of Biostatistical Practice 1 Unit

Terms offered: Fall 2018, Spring 2018

This course is designed to introduce students to the foundations of statistics in the context of biological research. Rather than focusing on a catalog of specific methods (by essence non-exhaustive and rapidly outdated), the course emphasizes general concepts and approaches necessary for sound statistical practice. Topics covered include: exploratory data analysis (EDA); data visualization; inferential reasoning; models and assumptions; statistical computing; computationally reproducible research. The statistical methods and software are motivated by and illustrated on data structures that arise in current biological and medical research.

Foundations of Biostatistical Practice: Read More [+]

Rules & Requirements

Prerequisites: Consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 1 hour of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Foundations of Biostatistical Practice: Read Less [-]

MCELLBI 294 Current Topics in Biomedical Sciences 1 Unit

Terms offered: Fall 2022, Fall 2021, Spring 2021

This course will discuss cutting-edge topics in biochemistry, structural biology, cell biology, developmental biology and genetics. Lectures will be given by internationally recognized biomedical scientists that visit the Molecular and Cell Biology Department and present work currently performed in their laboratories. The class will include topics ranging from structural analysis of important signaling molecules, live cell imaging and high resolution microscopy of critical cellular structures, to genetic dissection of essential signaling networks in cells and developmental pathways in multicellular organisms. It is the goal of this class to expose students to both the breadth and highest standards of current biomedical research.

Current Topics in Biomedical Sciences: Read More [+]

Rules & Requirements

Prerequisites: Molecular and Cell Biology graduate students only

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details

Subject/Course Level: Molecular and Cell Biology/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Current Topics in Biomedical Sciences: Read Less [-]

MCELLBI 295 Careers for Life Sciences Ph.D's 1 Unit

Terms offered: Spring 2024, Spring 2023, Spring 2022

This course is designed to assist graduate students in the biological sciences with planning their postgraduate careers. Weekly guest speakers will present their experiences on a variety of topics.

Postdoctoral students are invited. Topics may include academia; job searches; setting up a laboratory; patent law/technology transfer; public policy/regulatory affairs; bioinformatics; science writing/technical support; forensic science; postdoctoral positions in industry; teaching, and other topics of interest.

UGBA C5 Introduction to Entrepreneurship 2 Units

Terms offered: Fall 2022, Fall 2021, Fall 2020

This course offers students a taste of what it's really like to start a business. In addition to learning key foundational entrepreneurial concepts such as idea generation & evaluation, customer & product development, creating a business model, fundraising, marketing, and scaling & exiting a business, students will also hear from successful entrepreneurs who share their perspectives and best practices. Students will apply core concepts by working in teams to evaluate and select a venture idea that they will then develop throughout the semester.

Introduction to Entrepreneurship: [Read More](#) [+]

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details

UGBA C12 The Berkeley Changemaker 2 - 3 Units

Terms offered: Fall 2024, Summer 2024 Second 6 Week Session, Spring 2024, Fall 2023

Berkeley Changemaker impact occurs across many fronts: scientific, artistic, social, and entrepreneurial. This course helps students identify as a Berkeley Changemaker and learn the critical thinking, communication, and collaboration skills to become one. Combining disciplines across UC Berkeley, the course also helps launch the Berkeley Discovery arc. Students develop their own leadership styles and discover how they can create and lead diverse teams to act upon the world. Values in Berkeley's DNA like Questioning the Status Quo and going Beyond Yourself support students in leading from whatever position they occupy, preparing them to leave their mark on campus, in their communities, or beyond. More at: <http://changemaker.berkeley.edu>.

The Berkeley Changemaker: Read More [+]

Hours & Format

UGBA 88 Data and Decisions 2 Units

Terms offered: Fall 2024, Summer 2024 8 Week Session, Spring 2024

The goal of this connector course is to provide an understanding of how data and statistical analysis can improve managerial decision-making.

We will explore statistical methods for gleaning insights from economic and social data, with an emphasis on approaches to identifying causal relationships. We will discuss how to design and analyze randomized experiments and introduce econometric methods for estimating causal effects in non-experimental data. The course draws on a variety of business and social science applications, including advertising, management, online marketplaces, labor markets, and education. This course, in combination with the Data 8 Foundations course, satisfies the statistics prerequisite for admission to Haas.

Data and Decisions: Read More [+]

Rules & Requirements

Prerequisites: One semester of Calculus (Math 16A or Math 1A).

Also, this is a Data Science connector course and may only be taken concurrently with or after completing Computer Science C8/Statistics C8/Information C8

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture per week

Summer: 8 weeks - 4 hours of lecture per week

Additional Details

Subject/Course Level: Undergrad. Business Administration/
Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Miller

UGBA 123 Operating and Financial Reporting Issues in the Financial Services Industry 3 Units

Terms offered: Fall 2024, Fall 2023, Fall 2022

This course examines how accounting in the financial services industry – banking, insurance, investment industry, and real estate – actually operates. Students learn about underwriting and pricing in each sector, investment processes and controls, incentive-based profit sharing, risk management, and the factors that contribute to profitability. Students learn what financial statements reveal about estimates companies make regarding liabilities and, more generally, what they reveal about how companies deal with uncertainty associated with predicting and measuring financial results. Students examine the controversy over employing Fair Value Accounting across sectors and learn about other sector-specific accounting requirements.

Operating and Financial Reporting Issues in the Financial Services Industry: Read More [+]

Rules & Requirements

Prerequisites: Students are encouraged to complete UGBA 102A or to possess a basic understanding about how financial statements are prepared

Hours & Format

Summer: 6 weeks - 7.5 hours of lecture per week

Additional Details

Subject/Course Level: Undergrad. Business Administration/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Operating and Financial Reporting Issues in the Financial Services Industry: Read Less [-]

UGBA 125 Ethics in Accounting 3 Units

Terms offered: Fall 2024, Fall 2023, Fall 2022

This course focuses on ethics related to the accounting for and reporting of financial statements and related financial information, and touches on the ethics of tax preparers. It is taught within the context of the American Institute of Certified Public Accountants (AICPA), as well as broader ethical concepts. This course fulfills the accounting ethics education requirement of the California Board of Accountancy, needed for a California CPA license. The course covers (i) theories and rules and (ii) the application of these theories and rules to case studies drawn from real life. Students are taught not only to identify the risks of fraud, but also how an organization's culture and structure might be altered to reduce the risks.

UGBA 131A Corporate Strategy and Valuation 3 Units

Terms offered: Spring 2024, Spring 2023, Spring 2022

The course is designed to cover advanced corporate finance issues. Its purpose is two-fold. First, it will help students develop a tool-box, both conceptual and quantitative, to address real-world corporate financial issues that they will likely use immediately in any finance-related career. Second, the course is designed to give the "the big picture," i.e., sharpen understanding of how corporate financial strategy helps increase a firm's value in a dynamic environment. The course examines qualitative factors that help determine financial strategy, including the costs of financial distress and the value of financial flexibility, as well as quantitative techniques, such as option pricing, that will be helpful in various analyses.

UGBA 154 Power and Politics in Organizations 3 Units

Terms offered: Summer 2024 Second 6 Week Session, Fall 2023, Summer 2023 Second 6 Week Session

This course will provide students with a sense of "political intelligence." After taking this course, students will be able to: (1) diagnose the true distribution of power in organizations, (2) identify strategies for building sources of power, (3) develop techniques for influencing others, (4) understand the role of power in building cooperation and leading change in organizations, and (5) make sense of others' attempts to influence them. These skills are essential for effective and satisfying career building.

UGBA 156 Berkeley Changemaker: Living with Agency 2 Units

Terms offered: Spring 2024

What does it mean to “live with agency”? This course emphasizes the Berkeley Changemaker pillars of critical thinking, effective communication, and productive collaboration. You will combine critical examination of evidence-based, multi-disciplinary research and theories with personal self-reflection. These are interwoven with implementable strategies, directly applicable to the business context, to help you develop a sharper sense of who you want to be along with tools to make that happen. Frequent guest speakers, simulations, and discussions allow you to learn from others as you expand your network. L&S/UGBA C12/C196C is not a prerequisite but is highly recommended since this course complements and builds on that class.

UGBA 160 Customer Insights 3 Units

Terms offered: Fall 2024, Spring 2024, Fall 2023

Consumer behavior is the study of how consumers process information, form attitudes and judgments, and make decisions. Its study is critical to understand how consumers think and behave, which is critical for a company wishing to develop a customer focus. Given how different people are, it is amazing how similarly their minds work. Consumer psychology is the systematic study of how consumers perceive information, how they encode it in memory, integrate it with other sources of information, retrieve it from memory, and utilize it to make decisions. It is one of the building blocks of the study of marketing and provides the student with a set of tools with diverse applications. Customer Insights: Read More [+]

UGBA 161 Market Research: Tools and Techniques for Data Collection and Analysis 3 Units

Terms offered: Spring 2020, Spring 2019, Spring 2017

Information technology has allowed firms to gather and process large quantities of information about consumers' choices and reactions to marketing campaigns. However, few firms have the expertise to intelligently act on such information. This course addresses this shortcoming by teaching students how to use customer information to better market to consumers. In addition, the course addresses how information technology affects marketing strategy.

UGBA 162A Product Branding and Branded Entertainment 2 Units

Terms offered: Fall 2022, Fall 2021, Fall 2020

As consumers demand information and products tailored specifically to their individual needs, brands strive to create alternative advertising methods to build lasting relationships and retain "top of mind" status. Smart consumers, especially those in niche markets, have dismissed traditional avenues of sponsorship and product placement. Course explores how and why brand executives across multiple industries are leveraging entertainment to connect with niche markets. It educates students about how marketers develop creative and entertaining ways to connect with multi-hyphenate customers. Course culminates in a Creative Pitch, based on a case study, and a Client Presentation where students present marketing campaigns to industry executives.

UGBA 171 Tech and the City: How to Get Urban Innovation Right 3 Units

Terms offered: Spring 2024, Spring 2022

This course critically examines how new technologies and business models impact cities, and identifies the approaches that produce not only the best business outcomes, but also the most equitable and sustainable outcomes. To begin, we explore what makes cities such compelling laboratories for technology innovation, learn from past attempts at “smart city” interventions, and discuss how technologists can identify more effective solutions to today’s urban challenges. We’ll then hear from a variety of cutting edge practitioners, including venture investors, startup founders, government officials, tech journalists and community organizers about the unique opportunities and challenges of building an urban tech startup today.

UGBA 176 Innovations in Communications and Public Relations 2 Units

Terms offered: Fall 2024, Fall 2023, Fall 2022

This course introduces students to public relations and how it is used by companies, non-profits and individuals to build and support their brands through innovative communication techniques. Students will hear from and have direct access to entrepreneurs and established executives who share insights on how they've used creative public relations campaigns and communications skills to create attention and value for their brand or avoid it in a crisis. They also learn to work in teams crafting effective media responses for an existing company needing real help now (not a case study). The semester ends with each student applying this technique to create their own personal brand that they can refine as they prepare to move into the workforce.

UGBA 190C Collaborative Innovation 4 Units

Terms offered: Spring 2022, Spring 2020

This is a project-based course in collaborative innovation where students experience group creativity and team-based design by using techniques from across the disciplines of business, theater, design, and art practice. Students will leverage problem framing and solving techniques derived from critical thinking, systems thinking, and creative problem solving (popularly known today as design thinking). The course is grounded in a brief weekly lecture that sets out the theoretical, historical, and cultural contexts for particular innovation practices, but the majority of the class involves hands-on studio-based learning guided by an interdisciplinary team of teachers leading small group collaborative projects.

UGBA 191I Improvisational Leadership 3 Units

Terms offered: Fall 2024, Fall 2023, Fall 2022

This class explores the broad principles of improvisation, a performing art form that has developed pedagogical methods to enhance individual spontaneity, listening and awareness, expressive skills, risk-taking, and one's ability to make authentic social and emotional connections. The ultimate aim of the course is to help students develop an innovative and improvisational leadership mindset, sharpening in-the-moment decision making and the ability to quickly recognize and act upon opportunities when presented. In practical terms, this course strives to enhance students' business communication skills and increase both interpersonal intuition and confidence.

UGBA 192AC Social Movements and Social Media 3 Units

Terms offered: Spring 2020, Spring 2019, Fall 2017

This course provides a survey of innovative social movements and their complex relationships to social media technologies. It will examine the evolution from pre-social-media to present-day mobilizing strategies and the interplay between explicitly policy- and advocacy-focused approaches and related efforts rooted in music, visual arts, popular culture and celebrities. The course will place into comparative relief the discourses of explicitly racially- or ethnically-defined movements and movements that mobilize based on other, sometimes overlapping categories of marginalization including class, immigration status, gender identity and occupational category.

UGBA 192F Edible Education 3 Units

Terms offered: Prior to 2007

This course is a lecture series that explores the food system and its critical role in our culture, well-being and survival. Students will develop food-systems intelligence—a personal understanding of how the diverse facets of the food system relate to one another, especially one's own role as a participant in the food system and how individual and collective choices, actions, policies and public and private interests affect it. The course explores personal ethics, complex systems, entrepreneurial agency, and ways to develop a multi-sector perspective to food-systems change making. Students will develop plans at an individual, local, national, or global scale to improve, and possibly transform our food system.

Edible Education: Read More [+]

UGBA 192G Strategic Approaches for Global Social Impact 2 Units

Terms offered: Prior to 2007

The main objective of this course is to help students become effective practitioners in global development and understand career options in the global social sector. The course aims to (i) analyze the historical, sociological and statistical underpinnings of the major issues in global development (conflict, food security, human rights, poverty, health and education), (ii) understand what various organizations can contribute to each issue (government agencies, multilateral institutions, private foundations, NGOs, and private sector companies and entrepreneurs), and (iii) design and analyze approaches to addressing these issues.

UGBA 192H Managing Human Rights in Business 2 Units

Terms offered: Spring 2023, Spring 2021

This course, one of the first of its kind offered at a business school, will prepare students for the growing field of practice at the intersection of business and human rights. Students will gain an overview of the international human rights framework and global business and human rights standards and guidelines; analyze the ways in which companies can impact human rights, and to assess the degree to which companies are and should be responsible for human rights impacts; learn to manage a company's human rights impacts as corporate human rights managers, external consultants, or civil society advocates; and practice the communication skills necessary to successfully address human rights issues within a complex multinational corporation.

UGBA 192ID Impact Startup Disco 1 Unit

Terms offered: Spring 2024, Spring 2023, Spring 2022

This is a high-octane, single weekend course (plus one intro day) for students interested in meeting other innovators and getting hands-on experience developing a new impact startup concept. All "social and environmental" impact themes are welcome. The course is inspired by other "hackathon" and startup weekend formats. A structured roadmap helps guide students through a sprint formation and ideation process. All students will be asked to submit an idea during the week prior to the class. After a peer vote selects the top ideas, teams are organically formed during the first session. At the end of the course, each team will present their validated concept and their next steps plan to a panel of impact venture experts.

Impact Startup Disco: [Read More](#) [+]

Hours & Format

UGBA 192L Applied Impact Evaluation 2 Units

Terms offered: Prior to 2007

This course covers the methods and applications of impact evaluations, which is the science of measuring the causal impact of a program or policy on outcomes of interest. At its essence, impact evaluation is about generating evidence on which policies work, and which don't. This subject matter should appeal to three main audiences: (1) those in decision-making positions, such as policy makers and business leaders, and need to consume the information generated from impact evaluations to make informed evidence-based decisions, (2) project managers, development practitioners and business managers who commission impact evaluations and (3) researchers who actually design and implement impact evaluations.

Applied Impact Evaluation: [Read More](#) [+]

Hours & Format

UGBA 192S Business and Sustainability 2 Units

Terms offered: Summer 2024 First 6 Week Session, Summer 2023 First 6 Week Session, Summer 2022 First 6 Week Session

This course—a mixture of lectures, readings, business cases and corporate speakers—uses theory, frameworks, tools and business cases to teach students how to systematically evaluate and implement sustainability strategies that also maintain or maximize financial returns. Students are taught to identify opportunities to create business value from environmental and social challenges, and to evaluate the competitive implications related to sustainability initiatives. What type of long-term strategies can organizations set to simultaneously foster sustainable development strategy and sound financial practice? How should decision makers make trade-offs between these two organizational objectives? When is "sustainability" also "good business"? Business and Sustainability: [Read More](#) [+]

UGBA 193B Energy & Civilization 4 Units

Terms offered: Fall 2024, Fall 2023, Fall 2022

Energy is one of the main drivers of civilization. Today we are at the precipice of what many hope will be a major paradigm shift in energy production and use. Two transitions are needed. On the one hand, we must find ways to extend the benefits of our existing energy system to the impoverished people living in the developing world while continuing to provide these benefits to the people of the developed world. On the other hand, we must completely overhaul the existing system to fight climate change and other forms of air and water pollution. Are these shifts truly within our reach? Can we achieve both simultaneously? If so, how? This Big Ideas course will grapple with these questions using an interdisciplinary systems approach.

Energy & Civilization: [Read More](#) [+]

Rules & Requirements

UGBA 196SB Innovation and Entrepreneurship for Sustainability 3 Units

Terms offered: Summer 2024 First 6 Week Session, Summer 2023 First 6 Week Session, Summer 2022 First 6 Week Session

This course is an optimistic take on the daunting issues of environmental and social sustainability, primarily through the lens of innovation and entrepreneurship, and maps how new business creation can play a definitive role in addressing the social and environmental problems of sustainability. In terms of balance, the course starts with a primer on the fundamentals of innovation and entrepreneurship (the first 20% of the course) before moving on to the core topic of sustainability entrepreneurship (80% of the course).

UGBA 196SC Investing for Sustainability 3 Units

Terms offered: Summer 2024 First 6 Week Session, Summer 2023 Second 6 Week Session, Summer 2022 Second 6 Week Session

This course examines how capital markets and the investment industry are responding to the growth in social and environmental sustainability, both as a financial risk to investment opportunities and increased public awareness in the role of financial markets and investment in social and environmental issues. The course includes 1) an introduction to capital markets including institutional investment, public finance and private capital, and 2) an examination of the rise of sustainability-related investing including environmental, social and governance investing, mission-related investment, venture capital impact investing, blended finance and shareholder activism on issues ranging from climate change to diversity, equity and inclusion.

UGBA C196C The Berkeley Changemaker 2 - 3 Units

Terms offered: Fall 2024, Summer 2024 Second 6 Week Session, Spring 2024, Fall 2023, Summer 2023 Second 6 Week Session

Berkeley Changemaker impact occurs across many fronts: scientific, artistic, social, and entrepreneurial. This course helps students identify as a Berkeley Changemaker and learn the critical thinking, communication, and collaboration skills to become one. Combining disciplines across UC Berkeley, the course also helps launch the Berkeley Discovery arc. Students develop their own leadership styles and discover how they can create and lead diverse teams to act upon the world. Values in Berkeley's DNA like Questioning the Status Quo and going Beyond Yourself support students in leading from whatever position they occupy, preparing them to leave their mark on campus, in their communities, or beyond. More at: <http://changemaker.berkeley.edu>.
